Battle Infinity (IBAT) Price Prediction: IBAT Could Skyrocket 10-Fold After PancakeSwap Listing

Original:

<https://www.btcc.com/en-US/academy/research-analysis/battle-infinity-ibat-price-prediction-ibat-could-skyrocket-10-fold-after-pancakeswap-listing>

Battle Infinity (IBAT) finished its pre-sale 66 days early. Listing IBAT on decentralized exchanges (DEXs) and centralized exchanges (CEXs) is the next step on Battle Infinity's road map . The group has previously announced IBAT's inclusion on PancakeSwap, and August 17 is the scheduled launch date for the token's trading on the DEX.

The PancakeSwap listing should be worth 10 times as much

to Battle Infinity as it is now

On August 10th, Battle Infinity announced that IBAT would be listed on the top-tier DeFi exchange PancakeSwap. Those who did not participate in the presale will have another chance to acquire tokens when the company investigates further listings on CEXs.

Token holders may see gains of more than 10 times their initial investment if IBAT becomes live on PancakeSwap. The increasing value of IBAT tokens is a major factor that could lead to this happening. 66 days earlier than expected, \$5 million in BNB tokens were raised during the IBAT presale. The second allocation sold out in less than 24 hours during the presale.

In addition, IBAT has brought in a hard-charging marketing group that will help the token gain traction. The same group of marketers are responsible for the success of other products like Lucky Block. Due to the team's marketing efforts, Lucky Block gained 90 times as much, and Battle Infinity, with its unique strategy and clear route map, has a good chance of breaking that record.

The future seems bright for Battle Infinity

Both the immediate and long term futures look bright for Battle Infinity. One of the fastest-growing fields in the crypto industry and beyond is the metaverse. There will be a huge demand for projects like IBAT that provide services in the metaverse in the not-too-distant future.

As a result, there has been a rise in interest and sales of crypto-based video games. The popularity and worth of some of the earliest blockchain gaming ecosystems, like as Axie Infinity and The Sandbox, have recently skyrocketed. IBAT has all the makings of the next big thing in blockchain gaming, with its well-thought-out road map, dedicated crew, and distinctive services.

In a research, McKinsey & Company estimated that the metaverse would be worth \$5 trillion by 2030. The metaverse has received over \$120 billion in investments in 2022. Therefore, there is potential for huge profits for early investors if IBAT successfully captures a sizeable portion of the metaverse market.

One of the most promising new metaverse platforms of 2022 is Battle Infinity. The long-standing fantasy sports platform features a rich 3D environment where users can create and use avatars to engage with one another. Users will also be able to acquire non-fungible tokens (NFTs) representing virtual land.

In addition to Battle Infinity, Battle Infinity will be a part of this universe. Battle Infinity will provide a token-swapping service and a crypto-staking platform, expanding Battle Infinity's potential user base.
