Bet2ken (BTK) Guide: How to Buy It?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/bet2ken-btk-guide-how-to-buy-it>

This is a step-by-step guide on how to buy Bet2ken (BTK) during the ICO. Just follow these simple steps below to begin your Bet2ken investment.

It should be noted that Bet2ken can be purchased using a variety of cryptos, including [Ethereum](#) (ETH), Bitcoin (BTC), Litecoin (LTC), and many more.

It will only take you a few minutes to complete your BTK purchase.

Step 1 – Sign up on the Launchpad

Enter all of your personal information into our launchpad at

<https://launchpad.bet2ken.com/register>, or use Google or Facebook to do so. You must provide your name, email address and password, and confirm that you have read and agreed to our Terms & Conditions, and pass the anti-spam protection.

Step 2 – Activate the Account

To access the Launchpad, you must first sign up and activate your account, then click on the link in your account activation email. If you do not receive this email within 10 minutes, please contact the website's support team.

Step 3 – Buy Bet2ken

In your launchpad dashboard, you can view your current status, balance, Bet2ken pricing, funds raised, and the amount of Bet2ken sold.

Just click on **"Buy Token Now."**

To participate in the ICO, every registered user has a unique address. This address is linked to a

personal deposit address in Bitcoin, Ether, Litecoin or other cryptocurrencies, enabling you to pay using your preferred method. BTK currently supports direct wallet transfers (Pay via Crypto) as a payment option. The system can determine the recipient, amount and payment mode for each user, as each user has a unique address.

Please choose the currency you want to pay in, enter the amount you want to buy, and click the **“Make Payment”** button to confirm the transaction. After selecting your preferred payment mode and confirming that you have agreed to the token purchase agreement, click **“Buy Tokens Now”**. To speed up the verification process, please enter the wallet address from which you transferred your funds to our address. After that, click on **“Confirmation Payment.”**

Step 4 – Wait for Confirmation of the Transaction

Please wait for the transaction to be confirmed by the network. This usually takes 5-10 minutes. While you wait, you can learn more about joining our community on any convenient social media platform: all links are located at the bottom of the transaction window.

After the transaction is completed, you will receive an email notification. It will show that the tokens have been purchased. Once credited to your account, the token will be displayed in your transaction table, which refreshes every 30 seconds. Although it always shows up as pending, you don't have to worry about it. Once the transaction is confirmed on the blockchain, your BTK and exchange rate will be locked in the system and displayed in your profile. Please note that delays may occur due to severe blockchain congestion or low transaction miner fees (set by you).

Once a transaction is sent to the specified address, it will appear in the transaction list.

As long as the ICO proceeds as planned, it will remain in your personal account balance. You will be able to withdraw your tokens to any BEP-20 compatible wallet you have added to your profile settings no later than one month after the ICO ends.

Bet2ken has a referral program where you can earn 1000 BTK per invite and your account will receive tokens after your friends use your link to buy tokens.

This is all for how to buy Bet2ken. Hope you find it helpful.
