00 token price prediction: Will 00 token crypto hit \$5?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/00-token-price-prediction-will-00-token-crypto-hit-5>

Here we'll discuss the 00 token price prediction for 2022 – 2025 in detail, and before that, let's take a quick look at what exactly the 00 token crypto is.

A brief glance at 00 token (00)

[00 token](#) is a decentralized, Ethereum-based [ERC-20](#) token that's used to govern the 00 DAO and its ecosystem.

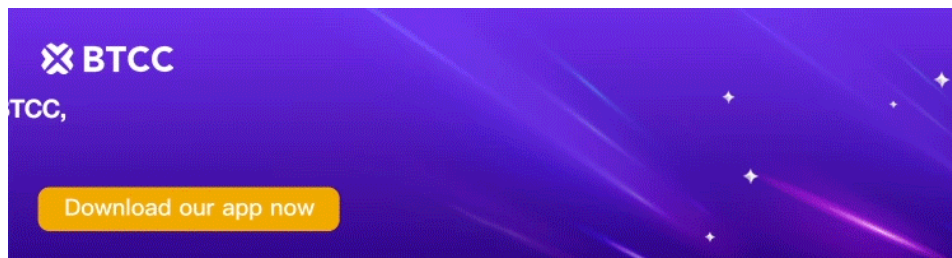

00 token is both a governance token and utility token which allows members of the 00 [DAO](#) to vote on decisions such as business leaders, funding initiatives and more, and provides access to the 00 [DEX](#). The 00 token is used as a base for all pairs listed on the 00 DEX, giving it value for investors.

00 Token's Ecosystem Fund, which increases with the number of tokens over time, benefits from residual supply. Ecosystem Fund token holders can use their tokens to vote on how the Ecosystem Fund is used. Each token is weighted equally when it comes to deciding how to use the fund – there are advantages to owning multiple tokens.

The token also entitles the owner to access to P00LS' wallet of creator coins. You can think of it as the center of gravity of the creator coin galaxy. Spend it in any one of P00LS' solar systems to explore what each brand has to offer you.

00 tokens are distributed to a community of free participants who will rightfully earn coins as they participate in the P00LS ecosystem. And as standard practice, a portion of the tokens rewarded to the contributors to the 00 ecosystem will be locked and will only be released if the contributor continues to provide services to 00 community. Locking up tokens incentivizes contributors to keep providing services to the ecosystem.

The total supply of 00 tokens is permanently set at 1,000,000,000.

About P00LS

P00LS is a creator crypto exchange that partners with creators and brands, who then distribute tokens to their communities, to list these tokens on the P00LS decentralized exchange, so they can be traded on the Ethereum blockchain. Working with them will incentivize audiences and fanbases to consume quality content, and empower them to promote and share this awesome content. With P00LS, you can finally make money in other ways than just sales without giving up control.

P00LS is all about putting power in the hands of creators and companies. All creator tokens can be purchased and exchanged for 00 token (00) on 00's marketplace. You can use 00 to access voting, stakeholder decision making, and the latter portion of a coin offering. All these features are possible with 00.
