Meta Platforms (META) Stock Price Forecast 2024, 2025, 2030 — Is Meta Stock a Good Investment?

Despite a turbulent year, [Meta](#) Platforms' stock price just reached a record high because to enthusiasm fueled by AI.

The owner of Facebook has been having a great 2024 up until the summer, when chief executive Mark Zuckerberg announced his intention to increase AI investments. This caused analysts to get nervous.

The price of Meta stock has since rebounded, though, and many Wall Street analysts think it may rise much further until 2026.

In this Meta stock forecast, we examine the company's goals, evaluate its performance over the previous 12 months, and present the most recent analyst META stock predictions.

Key Takeaways

- In October 2024, the price of META stock reached an all-time high of \$576.47.
- Second-quarter revenue shot up 27% to \$39.07 billion.
- Mark Zuckerberg, the CEO, intends to make large investments in AI.
- Analysts predict that throughout the upcoming year, the price of Meta stock may increase.

Is Meta Stock a Good Investment?

Have you thought about buying Meta stock but can't quite make up your mind? Taking your time before making major financial commitments is a wise move. Is it wise to put money into Meta/Facebook stock, then?

Everyone agrees that Facebook is a phenomenal example of the American dream realized in the Internet age.

Mark Zuckerberg's leadership has surpassed many people's expectations, taking the company to exceptional heights in a relatively short amount of time (only 18 years). In the years to come, he might perform a few more tricks.

Investing in Meta Platforms, Inc. seems prudent in light of the success of Facebook and other businesses under its umbrella. Acquiring a substantial holding in Meta stock can pave the route to a prosperous financial future.

You should think long and hard about the company's shares before buying it, especially in light of Facebook and Meta's recent problems. So many lawsuits and other scandals continue to follow the corporation. Facebook and the entire Meta conglomerate will be impacted if most nations decide to regulate social media. While the stock price has dropped, Meta is still a promising buy.

The advertisement features a green background with a subtle grid pattern. At the top center is the BTCC logo, which consists of a white 'X' shape followed by the letters 'BTCC' in white. Below the logo, the text 'Level up your VIP status for more benefits' is written in a bold, yellow font. Underneath that, 'BTCC - Your preferred crypto futures exchange' is written in a smaller, white font. At the bottom of the banner, there are three main elements: on the left, a white button with the text 'Download our app now'; in the center, two black buttons with white text: 'Available on the App Store' (with the Apple logo) and 'GET IT ON Google Play' (with the Google Play logo); and on the right, the text 'Support fiat and crypto deposits' in white. The banner is decorated with several floating Bitcoin icons in blue and yellow.

Will Meta Stock Hit \$1,000?

Meta (Facebook) stock has the potential for tremendous growth in the coming years, despite its recent drop. It's possible to spend over a grand on it. It may take fewer years for the stock to reach this height if the corporation fully utilises the Metaverse, as it wants to do.

Conclusion

Finally, what does our Meta stock prognosis for the future look like?

Meta is in a prime position to spearhead artificial intelligence advancements, and who would have thought that Mark Zuckerberg wouldn't see this through?

Nevertheless, keep in mind that this is a brand-new, fast-growing field that will most certainly necessitate investments worth billions of pounds in the years to come.

The market is nervous about it, and investors won't be able to relax until they see favourable reports on a quarterly basis.

The stock price of Meta will be closely watched until the end of October 2024, when the firm is expected to report its third-quarter results.
