What Is Songbird (SGB)?

Songbird (SGB) is the canary network for Flare, which is developing a stake- and mining-free smart contract. For Flare, you can choose between two main varieties. There's a long-term goal to Songbird (SGB), too. After Flare is published, it will be used to assess the state of the mainnet and any impending improvements. A more advanced Canary system and a more trustworthy Flare system might result from this.
