## A Closer Look at the Celsius Crypto Review of 2022

Original:

<https://www.btcc.com/en-US/academy/research-analysis/a-closer-look-at-the-celsius-crypto-review-of-2022>

[Bitcoin](#) interest accounts have been around for a while. However, there are only a few big companies in this market. Temperatures below zero degrees Celsius are among them.

[Cryptocurrency](#) deposits at [Celsius](#) can earn high interest rates. Low-interest loans in crypto and USD are also an option. Additionally, Celsius allows you to send cryptocurrency to a recipient without incurring additional expenses.

The likelihood is that Celsius will appeal to those currently engaged in bitcoin borrowing and lending. If you've never heard of it before, don't worry. In this article, we're taking a closer look at Celsius crypto review of 2022.

---

Celsius has declared that withdrawals, transfers, and swaps for users would be halted on June 12, 2022. Customer assets may be locked at Celsius until (or if) Celsius enables consumers to leave again, which is bad news for them. Celsius is trying to avoid a "bank run" on its assets, even though the exact reason for this is unknown.

### What is Celsius?

The loan platform Celsius is built on the [Ethereum blockchain](#). As of March 2018, it had issued its first coin (CEL), which was created during the summer of 2017. Celsius was founded by Alex Mashinsky, S. Daniel Leon, and Nuke Goldstein. Celsius is headquartered in London, England. In total, the company has received \$93.8 million in funding from five different investors.

"What we take for granted in the United States is access to credit and interest revenue and making it fungible around the globe, so anyone can start a business," In an interview with CoinCentral, Mashinsky remarked, "We take the American ideal and make it available worldwide."

## Which Services Do They Provide?

The blockchain underpins Celsius, a decentralized financing platform. It is possible to borrow from Celsius or to store bitcoins with Celsius in order to be loaned out. In return, they'll be able to collect interest.

### Borrowing

You have the option of taking out a CEL or a cash advance (the native token of Celsius). Borrowing cash is the best option if you're short on funds. Coins of more than 40 different denominations can be used as collateral. Additionally, you should be aware that Celsius may make a loan to an institution in exchange for your collateral.

Instant loan approvals and no credit checks are available. Additionally, there will be no origination fees for you to pay.

Your crypto can be used as collateral, but you don't have to put up all of it at once. This is known as the loan-to-value (LTV) ratio, which is the percentage of the property's worth that is financed. Celsius has three possibilities for LTV: 25%, 33%, and 50%. For borrowers in California who select a 25 percent loan-to-value ratio, the interest rate is now 0% APR.

Rates for all other users typically begin at 1%. Choosing to get your payment in CEL, on the other hand, allows you to benefit from even reduced rates.

### Earnings/Rewards

Only accredited US investors will be allowed to make deposits and earn rewards after April 15, 2022. Even if you live outside of the United States, you can still earn. Celsius offers an APY of up to 18.63 percent for depositing your digital assets. With over a dozen stablecoins and one Gold token on the platform at the time of writing (PAXG). You don't have to have a large amount of cryptocurrency in order to earn interest. Weekly payouts are issued on Mondays.

Celsius has recently increased the in-kind reward APY on the USDC stablecoin to 9.32 percent. In addition, if you transfer USDC or USDT from another site or wallet, you can receive \$10 to \$600 in Bitcoin prizes. Those benefits may only be claimed by entering the promo codes STABLE10, STABLE50, or STABLE600 during the checkout process.

Profits are referred to as "rewards" in Celsius. Depending on the sort of cryptocurrency you use and whether or not you are located in the United States, the rewards vary. The percentage of your crypto portfolio that is made up of CEL tokens, even if you do not reside in the United States, qualifies you

for a reward bonus under Celsius' loyalty program.

Cryptocurrency holders in the United States are now unable to claim CEL awards. As a result, US citizens won't be able to take advantage of Celsius's best rates. For instance, Celsius now provides 14.05 percent APY as "in-kind" rewards for Synthetic Network Token (SNX). However, the APY would rise to 18.63 percent if you were successful in CEL. Consider the fact that CEL rates are constantly changing. As a result, the rates you see today may not be the same rates you see tomorrow.

## How is Celsius Compared to Other Lending Company

In terms of crypto loans and interest accounts, Celsius offers some of the greatest rates and lowest costs available today. However, not everyone will be able to benefit from it. The following chart shows how Celsius measures up:

### Rating

**APY**                      **Up to 18.63%**                      **Up to 8.50%**                      **Up to 7.25%**

**Min Deposit**        **\$0**                                      **\$0**                                      **\$0**

**Desktop Access**

**FDIC Insured**

## How to Get Started?

To sign up for a Celsius account, go to the company's website. Keep in mind that Celsius is heavily app-based. To use their web app, you must first complete the KYC and AML checks via their mobile app. To top it all off, there's a \$50 BTC bonus for new customers who register an account and deposit at least \$400 immediately.

## Is My Money Secure?

Neither the FDIC nor the SIPC guarantee the safety of Celsius deposit accounts. While the United States controls savings, the United Kingdom does not. You can't tell for sure if Celsius is lending your cryptocurrency to institutional investors. Depositing any coin with Celsius has some risk.

Withdrawals have been halted as of June 2022, and reports claim Celsius does not have enough assets to pay. Depositors are at danger here.

The safety of cryptographic keys should be briefly discussed as well. Celsius's partner custodian Fireblocks holds all deposited monies. Fireblocks also protects your private keys in the event of theft or loss.

## Is it Really Worth it to Go to All of This Trouble?

Celsius is pleased with the continuous rise in the CEL token. The Celsius network has a big user base and is often accessed. It's also a safe choice in the context of lending cryptocurrencies. It's a huge negative, however, since you now need to be an accredited investor to invest. The site is excellent if you're an accredited investor. In that case, you may not get the full benefit of the experience.

When it comes to bitcoin lending, Celsius is a leading player and could be well worth your time if you're not afraid of taking on the risk. We've compiled a comprehensive list of the best crypto savings accounts for you to peruse.

## FAQ

The following are some of the most frequently asked questions concerning Celsius:

### 1. Is Celsius Network legitimate?

When it was first launched in 2017, Celsius has gone from a small bitcoin lending and lending platform to a major one. Assets under management topped \$20 billion for the first time in August 2021.

## **2.Can I buy something from Celsius with my credit card?**

It's going to happen very soon. Currently on a waiting list, the Celsius Credit Card will allow cardholders to receive weekly rewards on their crypto collateral when it launches.

## **3.What exactly is Celsius Pro?**

Celsius Pro's Treasury management services are tailored to the needs of corporations, institutions, and high-net-worth customers.

## **4.Is there a welcome bonus if I sign up with Celsius?**

A \$10 to \$2,000 Bitcoin bonus is available to new users who join the site and make their first transfer of supported assets. The lowest transfer to get the \$10 bonus is \$100, but the maximum bonus is \$250,000, so you'll need to transfer at least that much to get it.
