Despite the fact that Battle Infinity's price is currently correcting down, the rising trendline is predicted to keep the cryptocurrency's value stable at \$0.00080. Due to the triple top resistance level sitting at \$0.002579, the price of IBAT has been unable to rise over this level.

IBAT's price dropped after a bearish engulfing candle formed, but it may have bottomed out there since the cryptocurrency is now in the oversold region and has hit the \$0.00079 triple bottom support level.

If candles start closing above this level, it could signal a bullish reversal in the price of IBAT. Immediate support for IBAT can still be found between \$0.00200 and \$0.002515. It is possible that IBAT's price will rise after it is listed on other exchanges and platforms.

So, keep a watch on the area around \$0.00079.
