Is Crypto Gambling Legal?

The laws around online casino gaming around the world can be complex. Taking the US as an example, in many states, online casinos are banned. However, it is not illegal for players to bet at an online casino in most states and there are many offshore casinos that cater specifically to US players. These online casinos operate in a gray area of the law, but they are broadly considered to be legal.

Crypto casinos are among these offshore casinos that cater to US players. They are legal to play with and, from a legal perspective, there are few differences between playing with a crypto casino versus playing with a casino that accepts fiat currency. In fact, most of the Bitcoin casino apps we reviewed accept both cryptocurrencies and bank transfers, credit cards, and e-wallets.

It's a similar story across other parts of the world where crypto casinos aren't regulated, so they operate in somewhat of a gray area but are not generally considered illegal.

Where to Buy Tokens for Gambling in Crypto Casino USA?

Before players can join the best crypto casino, they need to get their hands on cryptocurrencies like Bitcoin or another popular crypto that's accepted by top casinos. The best way to do that is using a crypto exchange.

Crypto exchanges provide an easy way to convert US dollars into cryptocurrency. Users simply need to sign up, deposit funds using a credit card, debit card, or bank transfer, and select the cryptocurrency they want to purchase. From there, they can transfer their crypto to a wallet (more on that below) and then use it to make a deposit at a crypto casino.

Crypto exchanges offer access to different cryptocurrencies and can charge high fees, so it's important for users to make sure they're picking the right exchange for their needs. eToro is one of the top crypto exchanges in 2023 because it offers a very wide range of cryptocurrencies and a flat 1.0% transaction fee no matter what cryptocurrency users want to buy. eToro also accepts a wide range of payment methods, enabling users to buy crypto with a credit card or an e-wallet like PayPal.

Crypto Gambling vs Crypto Investing

The financial markets have been compared to 'the world's biggest casino'. Due to whale manipulation, price wicks and stop hunts they can be hard to actively trade however for a consistent winrate - although cryptocurrency is perhaps the most friendly market to retail investors.

One way to gamble on a crypto that might 'go to the moon' is to invest early in a brand-new crypto coin, i.e. one at ICO or at presale. See our reviews of the latest crypto presales this year, including IMPT token.

Best Crypto Casino USA Online for Bitcoin Gambling: Conclusion
