How to Trade Futures on BTCC?

Step One: go to the [BTCC homepage](#) and log in to your BTCC account. If you do not have an account, you need to register first, and then fund USDT in your crypto wallet after registration.

Step Two: go back to the [BTCC official homepage](#), choose “Futures” -“USDT-M Perpetual Futures Contract”, and find the cryptocurrency/USD trading pair.

Step Three: choose the contract trading order type. BTCC contract orders are divided into market orders, limit orders and stop-loss orders.

- Market Order: users place orders at the best price in the current market to achieve fast trading.
- Limit Order: Limit Order is used to plunge to the top/bottom of the market, which is a user-defined bid/ask price. Once the market reaches the limit price, it can be filled.
- Stop Loss Order: Stop Loss Order can be interpreted as a “Breakout Order”, which is an advanced limit order where the user can set a custom bid/ask price. After the market reaches the limit price, it will be closed.

Step Four: adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Step Five: choose the lot size and set the stop profit and stop loss price .

Step Six: after setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Step Seven: click the buy or sell button, and the crypto contract order is completed.
