Cryptocurrencies have seen rapid development since entering 2024. The boom of crypto market greatly increases investors' enthusiasm and confidence, pushing the rally of digital assets. However, from bitcoin and Ethereum to Dogecoin and Tether, there are thousands of different cryptocurrencies, which can make it overwhelming for traders who first get started in the world of crypto.

In this article, we will list down the best cryptocurrencies that are expected to have huge potential in investment return.

Table of contents

Bitcoin (BTC)

Ethereum (ETH)

Dogecoin (DOGE)

Cardano (ADA)

Avalanche (AVAX)

Conclusion

How to Buy Cryptocurrency

Bitcoin (BTC)

• Market Cap:\$1.367 Trillion

Bitcoin is the first decentralized cryptocurrency. Based on a free market ideology, bitcoin was invented in 2008 by Satoshi Nakamoto. Nodes in the peer-to-peer bitcoin network verify transactions through cryptography and record them in a public distributed ledger, called a blockchain, without central oversight. Because additions to the distributed ledgers must be verified by solving a cryptographic puzzle, a process called proof of work, Bitcoin is kept secure and safe from fraudsters.

In terms of price and market capitalization, Bitcoin is the biggest cryptocurrency. In recent years, Bitcoin has seen several rise in its price. Despite of several significant price volatility, Bitcoin's price increased by more than 86% in the past year.

Ethereum (ETH)

• Market Cap:\$420.091 Billion

Ethereum is a decentralized, open source, and distributed computing platform that enables the creation of smart contracts and decentralized applications, also known as dapps. Only after Bitcoin, Ethereum has became one of the most dominant coin in the crypto market.

Ethereum's most notable feature is its pioneering role in introducing Smart Contracts to the blockchain world. Smart Contracts are self-executing, tamper-proof agreements with predefined rules that automatically execute when certain conditions are met, which enables businesses and individuals to establish trustless relationship in transaction. Besides, fast transaction processing and high security features also attract many investors.

Dogecoin (DOGE)

• Market Cap:\$29.415 Billion

Dogecoin is a cryptocurrency created by software engineers Billy Markus and Jackson Palmer, who decided to create a payment system as a joke, making fun of the wild speculation in cryptocurrencies at the time. It is considered both the first "meme coin", and more specifically the first "dog coin". Despite its satirical nature, some consider it a legitimate investment prospect.

It was mostly unheard of until 2020-21, when it gained the attention of major celebrities including Tesla founder Elon Musk. Since Dogecoin's explosive gain during the last bull market, it's inspired thousands of copycat meme coins—including highly successful ones like Shiba Inu. It records impressive growth due to a dedicated community, creative memes and relative low fee.

Cardano (ADA)

• Market Cap:\$22.036 Billion

Cardano is a public blockchain platform. It is open-source and decentralized, with consensus achieved using proof of stake. It can facilitate peer-to-peer transactions with its internal cryptocurrency, ADA. When launched in 2017, it was the largest cryptocurrency to use a proof-of-stake blockchain, which is seen as a greener alternative to proof-of-work protocols.

Cardano use cases rival those of Ethereum, with a focus on function and scalability. Cardano's ADA token has seen relatively modest growth compared to other major crypto coins. In 2017, ADA's price was \$0.02. As of April 2, 2024, its price was at \$0.618.

Avalanche (AVAX)

• Market Cap:\$19.175 Billion

Avalanche (AVAX) is a cryptocurrency and blockchain platform that rivals Ethereum. Launched in 2020, Avalanche aims to be fast, versatile, secure, affordable, and accessible. AVAX is the native token of the Avalanche blockchain, which—like Ethereum—uses smart contracts to support various blockchain projects.

Since its 2020 launch, Avalanche has been expanding its ecosystem with DApps and DeFi projects, including partnerships with Ethereum-based projects like SushiSwap and TrueUSD, and enhancing its connection with other blockchains through bridge developments.
