Big Eyes Coin and Tamadoge: Two Tokens to Dominate the Crypto Market

Original:

<https://www.btcc.com/en-US/academy/research-analysis/big-eyes-coin-and-tamadoge-two-tokens-to-dominate-the-crypto-market>

We can infer a great deal about the meme currency ecosystem from the popularity of top [meme coins](#) like [Dogecoin](#) (DOGE), [Shiba Inu](#) (SHIB), and Floki Inu ([FLOKI](#)), all of which center around dogs. Similarly, Tamadoge (TAMA) bases its value proposition on the ability to mint canine individuals and their many characteristics as nonfungible tokens.

Having a coin featuring a cat meme was unexpected. Big Eyes Coin (BIG) offers a unique twist, with its growth supported by a thriving community focused on protecting the world's oceans and other water bodies while also earning a passive income. Go on, let's investigate this more.

Big Eyes Coin (BIG)

The primary goal of Big Eyes Coin (BIG) is to move capital into the defi ecosystem and to safeguard the global environment. [Big Eyes Coin](#)'s strongest suit is its active user base, which is essential for the success of the platform's future endeavors. Big Eyes is cognizant of the fact that the cryptocurrency community is the beating heart of any given cryptocurrency. This means that the needs of the community and the appreciation of its members are top priorities.

With its foundation on [Ethereum](#) (ETH), Big Eyes Coin (BIG) is prepared to make the transition to PoS. The [cryptocurrency](#) market has not witnessed anything like this year's hype surrounding this parody coin. That's because it's a refreshing change of pace from the dog obsession that seems to dominate the meme coin ecosystem, giving people who care about cats and fish a chance to work on their own unique project while still benefiting from the high value of cryptocurrency.

The youth population is the largest demographic in the cryptoverse, and the Big Eyes Coin (BIG) mascot is designed in an Anime style to appeal to them. It's one of the leading NFT projects in the cryptocurrency industry, ranking among the top ten. Big Eyes is currently developing an exclusive NFT Sushi Crew club for the NFT holders in the area, allowing club members to receive special benefits and access to the highest quality NFTs on the market.

In contrast to Tamadoge (TAMA), BIG is supported by a charitable foundation and a non-profit organization called the NFT Crew Club, and it has as its dual goals the preservation of our planet and the generation of passive income for its holders. In contrast to the primarily superficial focus of Big Eyes (BIG), Tamadoge (TAMA) is primarily a play-to-earn platform centered around the NFT minting of a variety of dog qualities.

At the time of the introduction of the Big Eyes Coin (BIG) presale, 90% of the tokens will be distributed to the community in order to facilitate their management of the platform, while the remaining 10% will be divided evenly between a charity and marketing wallet. If you're looking for the next big thing in the cryptocurrency market, go no further than BIG.

Tamadoge (TAMA)

A metaverse game where players may earn in-game incentives, purchase NFTs, and exchange cryptocurrencies, Tamadoge (TAMA) is a play-to-earn platform. The Tamadoge pets that you create, breed, and trade on this platform can be used to compete with other users in the Tamaverse virtual world. With the help of smart contract technology, a Tamadoge pet will be issued as a new form of currency.

Each Tamadoge pet will have its own personality, and investors can use the platform's native cryptocurrency, TAMA, to buy 3D assets from the shop. If all goes as planned, big cryptocurrency exchanges like LBank and Uniswap will soon be listing Tamadoge, making it one of the greatest meme coins on the market.

Tamadoge's cash flow comes from the transaction fees users pay when buying and selling pets on the platform's NFT pet store. In the shop, customers and participants can pick up pet essentials like food and clothing, as well as luxuries like toys and accessories. Any number of pets can be owned by a user on the site, and each will have its own set of characteristics that together make up an NFT.

Why trade crypto futures on [BTCC](#)?

- Largest variety of futures: Daily, weekly, quarterly&perpetual
- Flexible leverage from 10x to 150x
- Lowest trading fees 0.03%
- Industry-leadingmarket liquidity
- Plenty of campaigns to win exciting rewards
