Big Eyes Coin Expected to Surge Above Coins Like Avalanche (AVAX) and Dogecoin (DOGE)

Original:

<https://www.btcc.com/en-US/academy/research-analysis/big-eyes-coin-expected-to-surge-above-coins-like-avalanche-avax-and-dogecoin-doge>

The current [cryptocurrency](#) market collapse is one of the worst in the history of the sector. Under different economic circumstances, the sector would have been written off as a total loss, but the perseverance and confidence of the local community has been the industry's lifeline.

The vast majority of [crypto](#) holders, aficionados, and members of the ecosystem strongly believe the bearish time is going to fade and are making moves and preparations for the market's next bullish period so they can get the best out of it and make large profits. Because of this, up-and-coming initiatives like [Big Eyes Coin](#) (BIG) have been able to carve out a niche for themselves.

There is a lot of excitement about the new cryptocurrency, and many investors believe it will outperform its predecessors. Everyone is wondering how it aims to compete with other meme coins like Avalanche ([AVAX](#)) and Dogecoin (DOGE), and if it has what it takes to become one of the most popular meme coins out there.

What set the Big Eyes Coin (BIG) distinct from other coins?

A meme coin's unique selling point is the problem it solves or the service it offers, and if it can do either, it will draw an audience willing to invest in it. In this regard, Big Eyes Coin (BIG) is not dissimilar to anything else. They spent years studying the cryptocurrency market and other successful projects before launching their own initiative, which aims to benefit cryptocurrency holders, the De-Fi business, and ocean conservation.

To make it easier for people to participate in the decentralized finance (DeFi) ecosystem and use blockchain technology to build wealth, [Big Eyes Coin \(BIG\)](#) was created. It's a flexible community token that will be given out when community tokens are widely used to fundraise by businesses and nonprofits around the world.

Big Eyes Coin (BIG) intends to ride this wave of popularity by making it easier to invest in cryptocurrencies and non-fungible tokens, thereby bolstering ecosystems built on the blockchain. The corporation hopes to profit from this development (NFTs).

The native cryptocurrency of the network, BIG, has many applications within the system. Not only can the basic coin be used to make purchases and store value, but it can also be used to stake, enter liquidity pools, pay for services, win rewards, and carry out NFT operations. The maximum supply of Coin tokens is set at 200,000,000,000,000.

Ninety percent of the tickets will be offered in a public presale, twenty percent through ticket exchanges, and seventy percent through the regular on-sale process. Half of the remaining 10% tokens will go into Big Eyes' advertising campaigns, while the other half will be donated to non-profits.

Big Eyes Coin (BIG) has pledged to create a fee-free system, with the exception of a 10% tax on the purchase and sale of NFT on this website.

Out of this total, 5% will be given to BIG Token holders, 4% will go to the NFT's developer, and 1% will be given to charity. The platform's dynamic tax structure enables users to take use of automated services including auto burn, liquidity pool acquisition, and a marketing wallet.

Big Eyes will also work with influential people from other social media platforms to spread the word about their meme coin. Users can also support the platform's continuing fundraising efforts by purchasing official merchandise.

The primary focus of the Big Eyes platform is removing roadblocks that prevent DeFi from gaining mainstream acceptance. Because the infrastructure supporting DeFi is still developing, just one person in a thousand can utilize it at current time. Big Eyes Swap, back-end infrastructure, and interactive teaching will help more people learn about the blockchain ecosystem and its potential uses.

Avalanche (AVAX)

Since its debut in 2020, Avalanche (AVAX) has enjoyed tremendous popularity thanks to its novel nature. It is the coin used on the Avalanche blockchain, which is fast, cheap, and environmentally friendly. It implements a one-of-a-kind algorithm known as proof-of-stake (PoS) (PoS).

Avalanche, the network's engine, drives a thriving ecosystem that is at the forefront of decentralized finance (AVAX). It is the preferred approach of deploying Web3 distributed applications due to its superior scalability and security (dApps).

With the fastest time-to-finality transaction processing in the blockchain industry, Avalanche (AVAX) is the brains behind the Avalanche smart contract platform.

Avalanche (AVAX) also features a transactional throughput that is second to none and a safety threshold that can be set to somewhere in the region of 80%. Although it is possible to use AVAX to create smart contracts, this is not its only application. Financial products, for example, might be created and traded across its network. Additionally, the token can be used by ecosystem participants to conduct business with one another. The stakes and rewards of the system are also doled out using Avalanche (AVAX).

Avalanche (AVA) is the most important verified cryptocurrency for launching assets, building applications, and setting up subnets; therefore, investing in AVA now is one of the best long-term cryptocurrency investments you can make in 2022.

Dogecoin (DOGE)

In 2013, the now-famous meme currency was first used as a joke inside a viral online meme. It was created by Jackson Palmer and Billy Markus as a jab at the hype surrounding cryptocurrencies at the time.

Dogecoin's (DOGE) unbelievable growth and inflationary features attracted the attention of many crypto fans and owners, including Elon Musk, leading to a price increase of 300 percent from its initial value.

During 2018, the value of Dogecoin (DOGE) plunged from an unbelievable high due to the general collapse of the cryptocurrency market. As a consequence of this, Dogecoin (DOGE) lost a large amount of its value. As luck would have it, the token has a devoted fan base that actively works to keep it alive and insures its continued existence.

In order to compete favorably with other meme coins, Big Eyes Coin (BIG) is developing a flexible infrastructure. It also acts as a mechanism for community members to generate big gains, and the presale going on will be the finest opportunity to benefit from the growth of the coin. This is a once-in-a-lifetime opportunity to significantly increase your crypto holdings and your potential for financial success.

Why trade crypto futures on [BTCC](#)?

- Largest variety of futures: Daily, weekly, quarterly&perpetual
- Flexible leverage from 10x to 150x
- Lowest trading fees 0.03%
- Industry-leadingmarket liquidity
- Plenty of campaigns to win exciting rewards
