What is Binance Learn And Earn Quiz?

With the goal of helping its customers better understand cryptocurrencies and blockchain

technologies, Binance created the Learn and Earn Program.

Users are encouraged to learn more about crypto by reading articles and watching tutorial videos. And then they'll use that knowledge to earn cryptocurrency by taking tests.

These have time-sensitive rewards that decrease in value with time. Both of the introductory classes cost 50,000 SHIB and cost half a billion US dollars.

What is Polymesh?

A layer 1 public permissioned blockchain called Polymesh was created for security tokens, which are virtual contracts for portions of real-world assets.

As a public permissioned blockchain, the network is open to all users. To participate in it, though, you must finish an identity verification procedure. All participants in the chain, including issuers, investors, stakers, and node operators, are subject to this verification procedure.

Particularly, node operators must be authorized and authorized financial entities. This raises network security because these organizations run a higher reputational risk than anonymous individuals.

Market participants can take use of the special advantages of private and permissionless networks thanks to Polymesh, which provides network trust without sacrificing transparency.

called POLYX Smart Chain (BSC, formerly Binance Smart Chain), which operates in tandem with the POLYX Beacon Chain. This means that there are now three distinct POLYX offerings
