Bitgert(BRISE) Has Been Growing Since the Issuance

Original:

<https://www.btcc.com/en-US/academy/research-analysis/bitgertbrise-has-been-growing-since-the-issuance>

[Bitgert \(BRISE\)](#) is not only the fastest-growing cryptocurrency, but also the cryptocurrency with the most searches in the world in 2022. This is from the Google search trend, even the largest cryptocurrency. But Bitgert has also been surpassing some of the largest cryptocurrencies on the market, and Shiba Inu is one of them.

Although it ranks 15th on the list of the largest cryptocurrencies in the market, Shiba Inu is being overtaken by the unstoppable Bitgert. Have you seen the growth of the holders of these two currencies? Bitgert is soaring, while the number of Shiba Inu holders is declining rapidly. Please read the following.

BRC20 Blockchain

Bitgert (brise) has been growing since the introduction of tokens. In the eight months since the project entered the industry, it is one of the fastest growing projects in the cryptocurrency market. The team launched a number of products and projects, making it super attractive. Bitgert BRC20 blockchain is one of the revolutionary products, which still causes ripples in the industry.

Bitgert is surpassing Shiba Inu and many other cryptocurrencies because of its impressive development and growth. BRC20 blockchain is a product that makes Bitgert leave many other projects behind. The Bitgert team is also bringing so many projects to the chain.

In fact, more than thousands of projects will appear on the Bitgert chain in a year. These are developments that attract cryptocurrency investors, users and developers more than Chivas, and so is Bitgert.

Shiba Inu

Shiba Inu has been surpassed by Bitgert in terms of growth and development, and its market value may be surpassed soon. One of the main problems affecting Shiba is the lack of practicability. Since the project started as a meme coin and was basically based on speculation, it lacks a project that can maintain its competitiveness (). This is different from Bitgert, which is building a payment system. After the meme currency began to die out, the lack of products made Shiba Inu have nothing to adhere to.

This is why the price is falling, the number of holders is also decreasing, and the market value of Shiba Inu is also decreasing. In order for Shiba Inu to compete with Bitgert and others, the team needs to first strive to develop its products to make the project obtain much-needed utility.
