## Bittrex Review 2023

Original:

<https://www.btcc.com/en-US/academy/research-analysis/bittrex-review-2023>

**Bittrex Review: Our rating for Bittrex exchange is 3/5.**

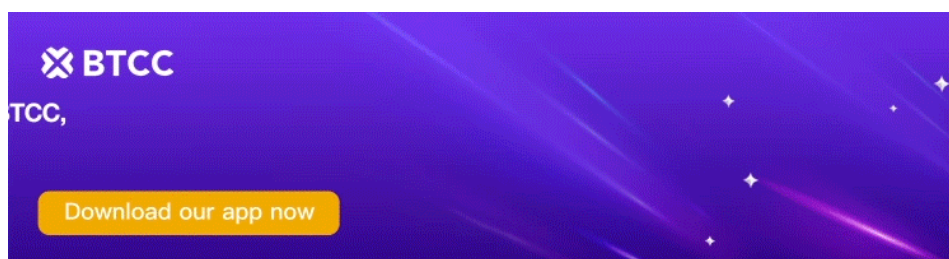

Bittrex could be a good option for active traders seeking relatively low fees and several order types. However, Bittrex's customer feedback is mostly negative.

### What is Bittrex?

Bittrex is a global crypto exchange offering over 250 cryptocurrencies to buy, sell, and trade. Users can benefit from relatively low fees, multiple order types, and a range of security features to help keep their funds safe.

While Bittrex is fairly user-friendly, beginners may be overwhelmed by its trading platform and the number of assets it supports. Thus, it could be better suited to more experienced crypto traders and investors.

This exchange initially offered only crypto-to-crypto trading, but it recently introduced fiat-to-crypto trading as well. However, it's worth noting that its fiat trading program is relatively new, so trading pairs are limited and fiat trading isn't available everywhere. This exchange is available in 46 U.S. states, excluding Connecticut, New Jersey, Hawaii, New York, and Vermont.

## Bittrex Review: Is Bittrex Safe?

Bittrex has several security features designed to help protect users' funds and suggests some account security best practices. The platform keeps the majority of user funds in cold storage. It also employs measures like two-factor authentication, and wallet and IP address whitelisting.

In addition to these features, Bittrex offers some helpful guidance for users on security best practices. This guidance includes tips for avoiding phishing attempts, keeping phones secure, creating strong passwords, and disabling your account in the event of a hack.

## What are the User Reviews on Bittrex?

Bittrex receives negative feedback overall from its users, and it has an average rating of 1.3 out of five stars across over 490 Trustpilot reviews. Users report issues with account lockouts, frozen assets, and problems with identity verification. Unfortunately, these concerns are common across many cryptocurrency exchanges and aren't unique to Bittrex.

Despite the negative feedback Bittrex has received, some users have positive things to say. Customers appreciate its wide selection of assets and its security features.

## Bittrex Review: Final Verdict

Overall, Bittrex could be a good choice for experienced crypto traders. The platform has hundreds of supported assets, with a focus on crypto-to-crypto trading pairs. Users will also appreciate its robust security features and the option to place advanced orders.

However, its trading interface and the large number of supported currencies may be overwhelming to beginners. Bittrex also offers relatively limited customer support, so novice traders may be better off with an exchange like Kraken, which provides phone support for urgent issues.
