comparable platforms, such as real-time price feeds, portfolio management, and multi-marketplace NFT comparisons, as well as faster NFT sweeps and a more intuitive interface.

\$BLUR is Blur's long-awaited native token. It's an ERC-20 governance token with a maximum supply of three billion. 12% of that supply is allocated to airdrop holders, with another 78% delegated to two lock-up contracts and 9% owned by a multi-sig wallet controlled by the Blur team.

Users have been collecting \$BLUR in the form of airdrops from the platform over the last few months, which may explain its growing popularity. The platform has received over \$14 million in funding from reputable investors and traders such as Paradigm, 6529, Cozomo Medici, dhof, Bharat Krymo, Zeneca, OSF, MoonOverlord, and others. Since its October 2022 launch, BLUR has already made waves, and with its unique features and strong investor backing, it's definitely one to watch in the NFT space.

Blur has carved out a niche in the highly competitive NFT market by excelling where other platforms have failed. One such area is the contentious category of creator royalties. The platform ensures a fair balance between creators and traders by offering extra BLUR tokens as an incentive for those who pay royalties.

Although Blur does not fully support secondary market creator royalties in the same way that OpenSea does, the platform has made a bold move to court creators by announcing that any collection that prevents sales on OpenSea can collect their full royalty fees on Blur.

Blur stands out from the competition due to its numerous features that support better NFT trading experiences. Real-time price feeds, faster NFT sweeps, and price sorting are among the features available. The platform's user-friendly interface can also benefit newcomers to the NFT market.

Furthermore, Blur does not charge trading fees for NFT sales and allows traders to view their digital assets via its portfolio tab, which provides detailed information about rarity, value, profit and loss, and more. Blur has raised over \$14 million from world-class investors and traders and is unquestionably a platform to keep an eye on in the NFT marketplace.

Blur's Web3 Appeal Makes It Unique

Blur's rise has been undeniable. Founded by Web3 dev Pacman and launched in October 2022, the low-fee, royalties-optional marketplace has overtaken OpenSea as the most popular marketplace, sporting \$1.04 billion in trading volume over the past 30 days, compared with OpenSea's \$479 million. That number is especially impressive given that Blur's collective trading volume amounted to over \$301 million between its launch in October 2022 to the end of December.

The marketplace's success is the result of its strategy to target a specific demographic of Web3 user: the pro trader. Where platforms like OpenSea or Objkt appeal more to more casual NFT enthusiasts engaging in smaller trades on an occasional basis, Blur is meant to hook those who engage in high-volume trades with reasonable frequency. The marketplace's stance on royalties, which has generally been to keep them as low as possible and allow traders the option to enforce them or not, speaks to this approach. This is also why, while Web3 giant OpenSea consistently has more daily active users, Blur rivals and occasionally surpasses the platform in trading volume.

Current Situation with BLUR Token

The earliest information out of CoinMarketCap put the token's fully-diluted market cap at \$14 billion, with a single \$BLUR token traded for just shy of \$5.00, but now the figures have dropped sharply.

At the time of writing, BLUR is trading at \$0.353 with a market capitalization of \$255,190,893, ranking #111 amongst all cryptocurrencies by that metric. BLUR coin has experienced a hard time gaining momentum over the past 24 hours, down 13.75% with a trading volume of \$158,231,769.

Nevertheless, BLUR has seen an overall increase of 12.3% in the past fortnight.

Now let's move on to the BLUR price prediction for 2023 and beyond.

Blur Crypto Price Predictions

Blur Coin has had tremendous growth in the cryptocurrency market from its launch date. The listing of Blur on numerous prominent exchanges, like as Coinbase, contributed to the token's growth in value and market capitalization. When Blur Coin reaches a new all-time high in 2023, its original investors will have gotten a handsome return. In February of 2023, the price of Blur Coin surged to an ATH of \$5.02.

The BLUR Coin had an incredible year this year. But Blur Coin's performance turned negative after setting a new ATH level. In the following months, Blur Coin can perhaps see some value recovery thanks to the next bull run. According to our research, Blur Coin's value will surpass the \$10 mark in 2028 and continue to rise over the long run.

Blur Price Prediction 2024

If the market conditions improve by 2024, Blur coin might potentially recoup some of its value. Our price projection indicates that by 2024, the average price of Blur Coin might reach \$1.88. Assuming no negative developments, the year might conclude with a price as high as \$2.31. If the market takes a bullish turn, Blur Coin has a good chance of regaining its position. Blur Coin's lowest possible price is roughly \$1.39 in a bearish market situation.

Blur Price Prediction 2025

We anticipate that this year will see Blur Coin values reach new all-time highs. On average, we might anticipate a price of \$3.15 by 2025, barring any adverse market fluctuations. But if the present trend of price increases persists, we expect Blur Coin will reach a maximum of \$4.37 in the year 2025. In 2025, if the market takes a negative turn, Blur Coin's lowest possible price might be about \$2.36. Our 2025 price prediction for Blur Coin might be blown to smithereens if the market turns positive.

Blur Token Price Prediction 2030

It appears that 2030 may be the beginning of a new era for the cryptocurrency sector. True digital assets based on projects will dominate the industry. By the end of 2030, the average price of Blur Coin might reach \$15.06, with a minimum value of about \$13.59. Many cryptocurrencies, including the Blur Coin, have the potential to reach new all-time highs this year.

Around \$18.25 is where the upper limit is anticipated to be traded. Our price prediction for Blur Coin might be blown to smithereens in 2030 if the cryptocurrency experiences a bull run.
