How to Trade Crypto Futures on BTCC?

BTCC supports trading for USDT- M Perpetual Futures contracts with a leverage of up to $500\times$, you can trade over 300 cryptocurrencies on BTCC at the most competitive price and highest security.

The following sets forth the step-by-step guidance for crypto futures trading on cryptocurrency exchange BTCC:

Step 1: Create a BTCC account

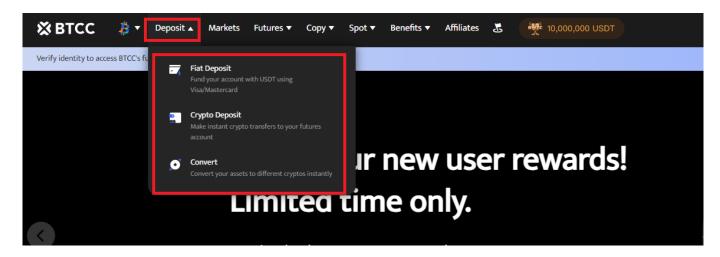

Sign up BTCC to start your journey on this leading crypto exchange.

Step 2: Complete BTCC's identity verification

Kindly verify your identity to ensure full compliance and enhance your trading experience on BTCC. You can access the <u>identity verification page</u>, fill out your country, upload your ID documents, and submit your selfie. You will receive a notification once your identity has been successfully verified.

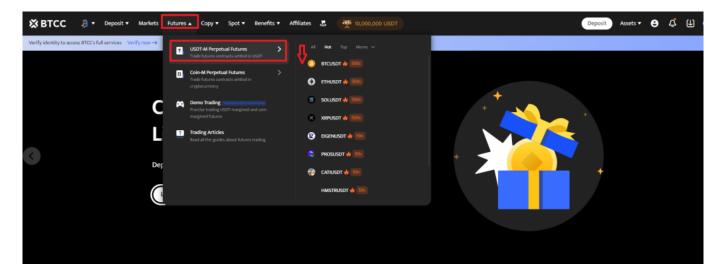

Step 3: Fund your BTCC account

On the <u>BTCC official homepage</u>, choose "Deposite", and then fund your account with your preferred method

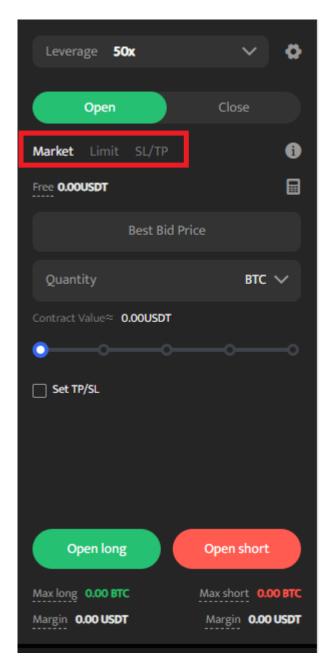

Step 4: Place your crypto futures order on BTCC

Go back to the BTCC official homepage, choose "Futures" -"USDT-M Perpetual Futures Contract", and find the crypto trading pair that you want to trade.

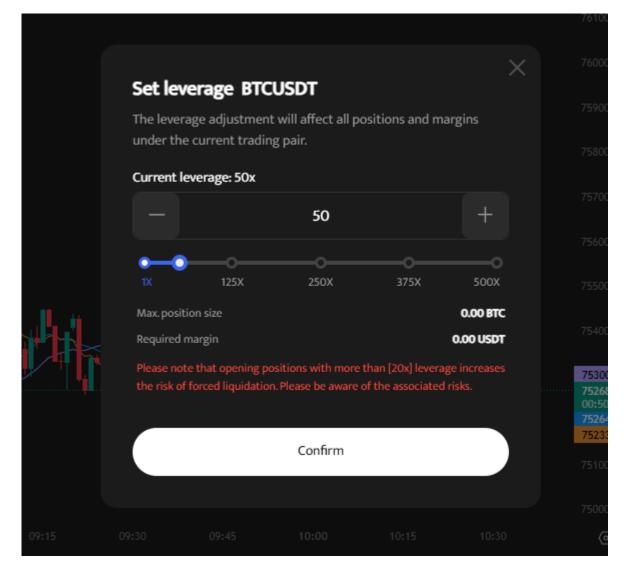

Then, choose the contract trading order type. Futures contract orders on BTCC platform include market orders, limit orders and SL/TP orders.

- Market Order: users place orders at the best price in the current market to achieve fast trading.
- **Limit Order**: Limit orders are a type of order to buy or sell futures at a price more favourable than the market price. When you buy at a price lower than the market price or sell at a price higher than the market price, the order will be in the form of a limit order.
- **SL/TP Order**: SL/TP orders are a type of order to buy or sell futures at a price less favourable than the market price. When you buy at a price higher than the market price or sell at a price lower than the market price, the order will be in the form of a SL/TP order.

Next, adjust the leverage multiple.

Please keep in mind that operating leverage carries the risk of liquidation. Leverage should be adjusted based on your financial status and risk tolerance.

Then, choose the lot size and set the SL/TP price. After setting the basic data information, users can choose to buy (open long) or sell (open short) after entering their ideal price. Traders should remind that the price cannot be higher or lower than the highest buying price or lowest selling price of the platform.

Finally, click the buy or sell button, and the crypto futures contract order is completed.
