What is Chia Network (XCH)?

Chia is differentiated from other layer 1 blockchains by its Chialisp and PoST characteristics. The Chia platform can run on the low-power, high-security Chialisp programming language, which is

based on the proof-of-space-and-time (PoST) consensus method. PoST has reduced network resource consumption, allowing for greater network expansion.

The process of making and developing Dapps on Chialisp has also been simplified. This protocol's decentralised peer-to-peer payment system has eradicated inefficiencies in the industry.
