## What is Coreum (CORE)?

Coreum is a smart-contract proof-of-stake blockchain built as core infrastructure for the future of decentralized applications and DeFi. It is an open-source project designed to be 100% community-based, enabling this technology to support extensive future growth in decentralized applications (dApps) and DeFi within the entire blockchain ecosystem.

The \$CORE token is a natively issued token on the Coreum chain, wrapped around smart contracts. They are highly customizable and designed to be lightweight and flexible, while remaining extendable. Truly plug-and-play, these tokens are faster, more secure, and more reliable than smart contracts.
