The volatility of cryptocurrency market can benefit or damage investors. It is widely predicted that metaverse will play an important role in cryptocurrency and the larger Internet by the end of 2022. Mark Zuckerberg's statement that Facebook will be renamed meta triggered a significant increase in the value of metaverse related projects. In just three days at the end of November 2021, Sandbox (sand), decentraland (mana) and Gala games (Gala) all soared by more than 100%, reaching an all-time high.

Although in 2022, some metaverse tokens have experienced a rough journey. Although the overall market value of metaverse has declined since the beginning of this year, it has begun to rise again in the past seven days.

Its market value is about \$30 billion, an increase of about 9%. In addition, decentralized Finance (defi) is expected to flourish rapidly in 2022. Seesaw protocol (SSW), a new version of defi, made headlines during its pre-sale period.

AXS (AXS)

[Axie infinity \(AXS\)](#) is a blockchain based trading and fighting game. In axie infinity, NFTs and play to earn mechanism are integrated together, making it an ideal choice for a serious tuple project. It is worth noting that each axie in the game is its own NFT.

Players can use axie infinity's native token [AXS](#) to pay for axes. You can plant, train and breed your axes, and fight with other users' axes to gain experience and level improvement.

Gala Games (GALA)

“Blockchain game you really want to play” is the straightforward goal of Gala games (Gala). Earlier this month, Gala games announced a plan to invest \$5 billion in 2022. It is reported that \$2 billion will be used for video games, \$1 billion for movies, \$1 billion for music, and the last \$1 billion will be used to build a theme park.

Galaverse Festival is a celebration of Gala games and is scheduled to be held in June 2022. The previous one was held in Las Vegas in December and attracted a considerable audience. Grammy award winning rapper Snoop Dogg also worked with Gala games to promote his upcoming album.

Seesaw Protocol (SSW)

For 2022, seesaw agreement (SSW) is one of the most promising new digital currencies on the market. Since its pre-sale at the end of January 2022, its utility has been widely discussed in the cryptocurrency community.

Connect BSW and Ethernet as a smart chain. Those who want to trade on the blockchain with the lowest oil price can use SSW to search the fastest chain. In a world where NFT has become more and more popular, this can be very beneficial.

You only need to look at the performance of seesaw protocol (SSW) in pre-sale to know its prospect. From the issue price of \$0.005, it has soared to \$0.14. An increase of 2700% is not a simple feat, and there are still three weeks to run.
