## What is Galxe (GAL)?

On September 6, 2022, Project Galaxy (GAL) has rebranded to Galxe ([GAL](#)), which highlights its mission & goal to fuel exploration for all in Web3.

“We are no longer a “project” but rather a fully-fledged ecosystem within Web3. We at Galxe are passionate about constantly innovating and pushing the boundaries of what’s technologically possible.” according to CMO at Galxe.

Galxe is a blockchain development platform that helps Web3 projects and developers build better products and communities using curated credential data. Put basically, credential data are just records that make up our digital identity. Data curators collect this data and are rewarded for its utilization.

Galxe identified that credential data is segregated across closed and permissioned databases owned by different parties like governmental, financial and credit institutions. This results in the data being unattainable to the individuals and companies that could make the best use of it. An example of credential data on the blockchain is a borrowing record from a money market or your on-chain voting history. However, off-chain credential data is often stored out of the reach of users and developers on private servers. Galxe aims to build an open and collaborative credential data network

accessible to all Web3 developers.

Another important aspect of the platform is the Galaxy ID, which is “aiming to become your Web3 LinkedIn.” The Galaxy ID includes a user’s individual user name, representing them across multiple chains and wallets, and displays their credentials collected in Web3. Developers can integrate the Galaxy ID toolkit and offer customized features based on the credentials provided, thereby tapping into a plethora of possibilities for different Web3 applications. Users can already integrate their Galaxy ID with Twitter, Discord and Github.

Finally, the Galaxy on-chain achievement token (Galaxy OAT) is a solution for event organizers and community managers to utilize the project’s NFT infrastructure and on-chain credential data network to build and distribute NFT badge campaigns easily and reward their community members. Galxe bills the OAT as “a digital record of all your life’s achievements.” The OAT aims for integration between one’s offline and online identities and could allow, for example, to combine offline events like concerts with online events through the issuance of NFTs.

GAL is the native token that powers Galxe. GAL holders have the ability to control the amount of the platform fee collected by the protocol and control funds held by the Galxe community treasury.

Developers using the data curated by Galxe have to pay a platform fee in GAL, which is mostly distributed among data curators. Curators utilize GAL to signal a data set’s value.

## **GAL Coin Price**

GAL went to the open market at \$1.50 on 5 May, 2022. On launch day, the token was trading hands at the all-time high (ATH) of \$18.26. After hitting the ATH, however, the price fell, first slowly and then quickly with continuous volatility.

While 2022 was a year which saw disaster strike the whole crypto sector, 2023 so far has looked a bit better for both GAL and the wider crypto market.

At the time of writing, GAL is trading at \$1.99 with a market capitalization of \$107,881,922, ranking #267 amongst all cryptocurrencies by that metric. In the past 24 hours, the price of Galxe has soared 5.72% with a trading volume of \$17,874,406.

## **GAL Price Prediction 2025**

GAL coin looks well-positioned to reach its full potential in the coming years. If Galxe successfully boosts market sentiment among crypto enthusiasts, GAL crypto price could continue to rise for the next five years.

In 2025, GAL coin price is estimated to reach \$2.89, at minimum, and the maximum price could be \$4.34, according to our GAL price prediction 2025. The forecasted average price could be \$3.61.

## **GAL Price Prediction 2030**

The Galxe ecosystem is actively growing with new users and brand partnerships and will remain viable in the long term. Our Galxe price prediction 2030 forecasts GAL to trade between \$5.92 and \$8.28 by the end of 2030. The average price of GAL coin might go to \$7.30.

In closing, please know the figures are generated using our price prediction tool and in that matter, not a guarantee, that the actual price action will follow what we mentioned. Forecasts are not immune to changing circumstances and will be updated with new developments. Be on the lookout for the market condition changes before investing in any coin.

### **FAQs**

---

#### **How high can GAL coin go?**
