What is Hooked Protocol (HOOK)?

The “on-ramp layer for massive Web3 adoption to form the future of community-owned economies” is what Hooked Protocol provides.

The program was made to provide a fun and accessible way for people of all skill levels to enter the cryptocurrency market, accumulate some crypto assets, and profit from them. In addition, the platform is equipping crypto investors with a variety of gamified learning tools that will facilitate

their entry into and adaptation to the Web3 ecosystem through the medium of play.

Its flagship product is Wild Cash, a quiz game that promises players “delicately tailored quiz challenges” in exchange for GOLD tokens.

Wild Cash has over 2.5 million monthly active users, over 50,000 new users, and 90% user participation in just three months after its launch (the DApp was launched in the third quarter of 2022). This makes it the first and only Web3 application to ever dominate a Google Play ranking.

The platform is attempting to address the lack of new users in the cryptocurrency business by focusing on the “billions of Web2 internet users who can be onboarded to Web3” through its learn-to-earn effort.

There will be a greater need for “trusted cooperation and a sustainable economic model in Web3” as a result of the “potentials for intrinsically dynamic modern virtual economy after covid are recognized and scaled up,” as stated in the whitepaper published by Hooked Protocol.

Hooked Protocol (HOOK) Price Prediction 2023

As markets consolidate, there is a substantial downward pressure on the Hooked protocol price. The major cryptocurrencies are gearing up for a huge surge, and the altcoins are anticipated to follow suit. It's possible that the HOOK price may also see a strong breakout at this time, sending it soaring upwards as the bullish trend continues.

Until the end of the month, the price might be quite stable, but it's likely to go up as we get closer to the conclusion of the quarter. By the conclusion of the first half of 2023, the price is projected to have stabilized in the range of \$3.2 to \$3.5 before using the collected strength to launch itself skyward. The HOOK price may reach \$4 by the end of 2023, but it may not break through to the ATH until 2024.

[Trade Hooked Protocol \(HOOK\) Now!](#)

Hooked Protocol (HOOK) Price Prediction 2024

After 2023 ends on a strong note, the price is predicted to immediately soar high in the first few weeks of 2024, forming a new ATH above \$5. New highs are expected to be followed by a bearish pullback that sends the price below \$4 for a period before a possible resumption of bullish momentum. As a result, it is anticipated that the price will experience a sharp upward trend in the start of H2 2024.

Markets may have initiated a significant bull run by the second half of 2024, thus the price is expected to continue mainly bullish for the remainder of the year. During the third quarter, the price of HOOK might skyrocket and pass the \$10 threshold; by the end of the year, the HOOK price could range from \$12 to \$15.
