## What is Hooked Protocol?

Backed by Binance and Sequoia, Hooked is an on-ramp layer protocol which aims to achieve a complete adoption of [Web3](#) by providing consumers & enterprises with specialized Learn & Earn product experiences and onboarding infrastructures to enter the new web3 world.

The protocol believes that a significant web3 revolution can be accomplished through gamified learning experiences and by returning economic value to its users. With the belief, the project is trying to even reach out to those with zero prior cryptocurrency experience and help them in making the most of the crypto industry, so that anyone—regardless of prior experience — can access, earn, and own a share of cryptocurrency.

Furthermore, Hooked Protocol is developing onboarding infrastructures in conjunction with the rapidly expanding community, in hopes of creating a thriving community with scalability and engagements as well as an ecosystem of community-owned economics, and capitalizing on viral growth and decentralized social networks.

## Main Functions and Highlights of Hooked Protocol

**1. Quiz to Earn App:** Hooked Protocol has launched a Quiz to Earn App called Wild Cash, through which users can begin an engaging web3 learning experience and win their first token reward.

**2. PoWT (Proof of Work and Time) Mining Game:** Using the traditional [Proof-of-Work](#) (POW) mechanism, this game encourages players to invest their time and efforts on the platform.

**3. Stake and Swap:** Using Hooked Wallet, users can store cryptocurrencies in their own crypto wallets, perform [staking](#) and swap operations, and transfer crypto assets.

**4. Social Referral:** Users can receive substantial financial rewards by sharing and creating their Web3 social graph.

In addition to providing a variety of exciting incentives, Hooked also offers customers a full range of Web3 onboarding options to aid in their Web3 transformation.

## Everything about \$HOOK Token

First let's have a brief glance at the protocol's token structure. Hooked tokenomics uses a segregation technique that applies a single token (\$HOOK) orientated structure augmented with the addition of an in-ecosystem-only utility token (\$HGT), reflecting the real value and enabling common use case functionalities.

### Hooked's Token Structure

- **\$HOOK:**The only liquidity governance token to reflect the value of the Hooked protocol ecosystem through a limited supply and planned emission scheme.
- **\$HGT (Hooked Gold Token):** The single utility token that exists within the ecosystem. It provides ongoing incentives and motivations for the community to make positive contributions.
- **\$uHGT (unlocked Hooked Gold Token):**A token created from the system to control the liquidity of \$HGT in order to reduce the risk of speculative attacks, in which a token's price fluctuation may damage the reputation and value of the network.

### \$HOOK Functions:

- Platform Governance token for Hooked ecosystem.
- \$HOOK will be used as the gas token for on-chain transactions by all DApps established on the Hooked ecosystem.
- Community members will be encouraged to hold tokens for special events and grants to purchase limited editions of platform NFTs that showcase the community's social status and network effects.
- To ensure significant liquidity and that token value will increase in direct proportion to the success of the entire community, \$HOOK will be reinvested in innovation methods that ultimately benefit the ecosystem of both individual participants and enterprises.

# HOOK Price Performance - A Bullish Start

HOOK launched on CoinMarketCap on 1 December 2022 and within a day had gained more than 40%, up from \$2.0626 to \$2.9016, the returns of which has made Hooked Protocol investors as well as people who are watching this project so excited. In general, HOOK has had a quite bullish start, a significantly positive aspect in an overall bear market.

Failing to sustain this bullish trend, however, the Hook coin price pulled back as the momentum faded.

At press time, HOOK is trading at \$1.00 with a market capitalization of \$50,176,328, ranking #368 amongst all cryptocurrencies by that metric. In the past 24 hours, the price of HOOK has decreased by 3.71% with a trading volume of \$5,567,929.

## HOOK Price Prediction 2023, 2025, 2030

Since the inception of Hooked Protocol, it has managed to keep the crypto active in many ways. Hook coin has recently lost some of its price value, but this price prediction would provide an insight into the price performance in the coming years.

Below pulls together our HOOK price prediction for 2023, 2025 and 2030, ensuring you have a rough idea of the coin's future value potential:

YEAR	MINIMUM PRICE	MAXIMUM PRICE
2023	\$1.20	\$1.40
2025	\$1.24	\$3.16
2030	\$7.01	\$7.62

## Hooked Protocol Price Prediction 2023

If the platform welcomes a thriving userbase and a spike in the rate of adoptions and collaborations, HOOK crypto might see impressive growth throughout 2023.

As per our HOOK price prediction 2023, HOOK coin is expected to reach a possible high of \$1.40 by the end of 2023. On the flip side, if the project fails to commit to its expectations, the price might slip down to \$1.20, with an average price of \$1.27.

## Hooked Protocol Price Prediction 2025

If Hooked Protocol manages to attract investors and whalestats with its developmental and community-building initiatives, HOOK price might experience a significant increase in 2025.

Our HOOK price prediction 2025 forecasts that at the very highest, HOOK coin price may reach \$3.16 by 2025. The minimum price could be \$2.54, with an average price of \$2.74.

## Hooked Protocol Price Prediction 2030

The Hooked Protocol ecosystem is growing with new users and may remain viable in the long term. Our HOOK coin price prediction 2030 forecasts that HOOK is expected to trade between \$7.01 and \$7.62 in 2030.

Here, it's worth pointing out that 2030 is still a long way away. 7 years down the line, the crypto market could be affected by a host of different events and updates, each of which is difficult to ascertain. Ergo, it's best that predictions like these are taken with a pinch of salt.

## Hooked Protocol Price Prediction: Conclusion

All in all, Hooked Protocol is an on-ramp layer for Web3, which offers customised Learn & Earn solutions and onboarding infrastructures for users and businesses to enter the Web3 world of fantasy. The project also launched a trial Quiz-to-Earn APP called Wild Cash with gamified learning features. The protocol believes that a significant web3 revolution may be achieved through gamified learning experiences and by returning economic value to its users.

Taking all these into consideration, it would appear that Hooked Protocol is a promising investment. Thus the HOOK crypto price predictions are exceptionally positive, mainly because the token does have a lot of potential, suggesting a major rise is on the way over the next several years.

In closing, please know the forecast figures are generated using our price prediction tool and in that matter, not a guarantee, that the actual price action will follow what we mentioned.
