Answer is : **False**

A Brief Overview of BTTC Tokens

Large files can be stored and shared using BitTorrent Chain's P2P paradigm, which relies on the network participants: peers, seeders, providers, and requesters. The entire network relies on the network participants: In order to get greater bandwidth and faster downloads, you can use the BTTC service. Movies and TV shows, as well as other multimedia content, can be downloaded from the internet.

The BTTC token is used as the primary mode of payment on the network, but it can also be traded in the cryptocurrency market for profit. Through the BitTorrent Chain Speed app, network members, such as service providers, can earn BTTC by sharing and selling more bandwidth to requesters.
