How to Become a Metaverse Developer in the Web 3.0 World?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/how-to-become-a-metaverse-developer-in-the-web-3-0-world>

If you want to be a [Metaverse](#) developer, you must learn how to develop this immersive experience for users. People tend to combine the terms “[Web3](#)” and “Metaverse”. Some people think they are the same thing. However, in order to fully understand them – each with its history and connotation – they need to be defined separately. For newcomers interested in decentralization and blockchain, Web3 is a new buzzword that needs to be explained.

Web3 is all about decentralization in the Internet era. It includes all the technologies that can realize this decentralization, including (or especially) blockchain. The concept of Metaverse predates the era of [cryptocurrency](#) and [blockchain](#). It can be said that it was born in the emergence of the Internet itself. However, Metaverse is basically a virtual world.

The concept of Metaverse was promoted after social media giant Facebook renamed its parent company meta in October 2021 and launched a comprehensive set of Metaverse development tools for developers and users. The participation of large companies in the vitality circle undoubtedly means some favorable opportunities to set career goals, become a vitality circle developer and take advantage of emerging prospects. This article mainly introduces how to become a Metaverse developer in the Web3 world.

Most beginners of Metaverse, even professional developers, have doubts about working in Metaverse. If you want to be a Metaverse developer, you must learn how to develop immersive experience for users.

General Use Case

- Although Web3 Metaverse is still in its early stage, it has proposed important use cases for cryptocurrency payment, such as.
- Peer to peer (P2P) transactions – Metaverse can facilitate the transaction of assets, tokens or cryptocurrencies between individual users without a central intermediary.
- Business to business (B2B) transactions – businesses, creators or manufacturers can market their products in the virtual world. They can hold meetings in the Web3 metauniverse to achieve sales and cooperation.
- Business to consumer (B2C) — enterprises or creators can sell their products directly to users in virtual space. In addition, delivery can be promoted through the Web3 Metaverse platform.
