How to Buy AiDoge? A Step-by-Step Guide for Beginners

How to Buy AiDoge? Quick Take

Step 1: Download Metamask

Step 2: Buy ETH, BNB, or USDT

Step 3: Set Up Presale Order

Step 4: Connect Wallet and Buy \$AI

What is AiDoge?

[AiDoge](#) is a new crypto project that aims to build on the ultra-popular shiba inu meme while launching new memes of its own.

The foundational idea of this project is to use generative AI to create new memes. The platform uses the same underlying AI algorithm as services like ChatGPT - which generates text - and DALL-e - which generates images.

Users can input a text prompt describing their idea for a meme or the subject they want to create a meme about. AiDoge's algorithm will then generate the perfect image and text to create a new meme. Creators can modify their meme if they want to make any adjustments, then share it with the world.

In addition, every meme created using AiDoge can be minted as an NFT. This enables users to

definitively prove that they are the creator of a meme – something that is rarely possible today when a meme goes viral.

In order to use AiDoge's meme generation algorithm, creators will need to purchase credits using \$AI. This is AiDoge's native ERC-20 token.

\$AI is available to buy on presale right now. AiDoge is offering up to 50% of the total \$AI token supply during the presale across 20 stages. The best way to keep up with the presale is to join the [AiDoge Telegram](#) group.

The presale is currently in Stage 3 and \$AI is selling at a price of \$0.0000268. However, the presale is selling out fast, so investors have limited time to lock in the lowest possible price for \$AI.

AiDoge is not to be mixed up with ArbDoge, an-already live token that has a similar ticker.

How to Buy AiDoge? Detailed Guide

Now that investors know the basics about AiDoge, we'll explain how to buy AiDoge during the presale. The process only takes a few minutes, or even less for investors who already own crypto.

Step 1: Download Metamask

Presale investors will need a compatible crypto wallet to connect to the AiDoge presale. We recommend Metamask, which is free and available for iOS and Android devices and most browsers.

Visit [Metamask's website](#) to download the wallet app, then set up an account.

Step 2: Buy ETH, BNB, or USDT

Investors will need to swap ETH, BNB, or USDT for \$AI tokens. The best way to get these crypto tokens is to purchase them from a crypto exchange like eToro.

eToro is a regulated crypto exchange trusted by more than 30 million people, and it offers low fees for buying and selling crypto.

Create an exchange account, add funds with a bank transfer or credit card, and then buy ETH, BNB, or USDT. Transfer the crypto tokens to the Metamask wallet.

Step 3: Set Up Presale Order

Visit the [AiDoge presale site](#) and find the order form near the top of the page. Enter which token (ETH, BNB, or USDT) to pay with and then enter the amount to invest. The order form will show how much \$AI this will buy after gas fees.

Step 4: Connect Wallet and Buy \$AI

Click Buy Now. Investors will be prompted to connect a wallet. Choose Metamask, and the AiDoge presale site will connect to the wallet automatically. Then simply confirm the transaction to finish buying \$AI.

All purchased \$AI tokens will be released to investors at the end of the presale, before AiDoge's exchange listing. Investors will need to reconnect their wallet to the presale site to claim their tokens.
