How to Purchase the Hot Play-to-Earn Game IBAT

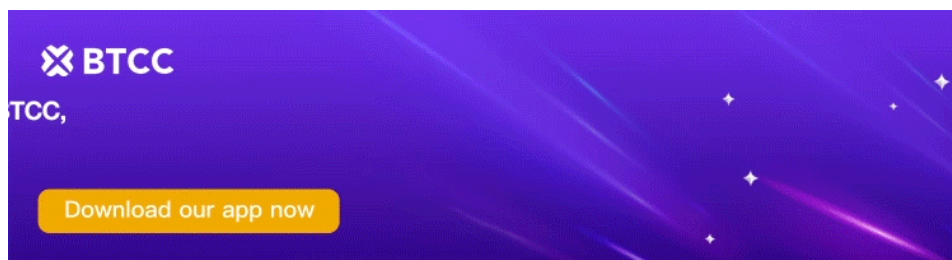

Original:

<https://www.btcc.com/en-US/academy/research-analysis/how-to-purchase-the-hot-play-to-earn-game-ibat>

Today, IBAT Will be Listing on Pancakeswap

Starting today, [IBAT](#) will be freely traded after being listed on its first exchange. Since [Pancakeswap](#) is Binance Smart Chain's most popular decentralized exchange, it was the obvious choice. The market will open for trade on August 17 at 16:00 UTC.

It's important to remember that there's already an IBAT trading on Pancakeswap, and that this is a scam. Pancakeswap does not currently feature the genuine [Battle Infinity](#). Pancakeswap allows anyone to create a listing, but users are encouraged to be patient while the listing is being reviewed.

In Just 25 Days, the IBAT Presale Brought in 16,500 BNB

Significant interest was shown in the IBAT pre-sale. The presale was supposed to last three months, but 16,500 BNB were raised in just 25 days.

Given that 16,500 BNB at current prices is worth \$5.2m, this is very amazing.

The player base as a whole will spend the next several weeks and months preparing for the release of the game and the Battle Arena.

IBAT Takes on the Rivals

The Battle Infinity crew is from India, a country that has emerged as a major center for the cryptocurrency industry and, more specifically, for “play to earn” video games. Projects like Polygon, WazirX, and Instadapp, which are among the largest in the sector, have all been initiated in India.

However, the play for profit is still in its infancy, and giants like Dream 11 and Mobile Premier League dominate the e-sports sector right now.

Battle Infinity is banking on the competitiveness of their game suite to take on these industry heavyweights. The initiative should be wildly successful because it makes use of the cutting-edge technology of P2E gaming and aims to appeal to a global audience rather than simply an Indian one.

The team is ecstatic about the project’s progress thus far, and they have been celebrating the presale’s success by throwing parties with models.

Future Plans for IBAT

Merchandise store, influencer marketing, Battle Infinity dApp alpha release on the Google Play Store, initial NFT sales, Battle Market V2.0 release, and additional exchange listings are the next steps on the Battle Infinity plan.
