How to Transfer Crypto from Coinbase to MetaMask

Original:

<https://www.btcc.com/en-US/academy/research-analysis/how-to-transfer-crypto-from-coinbase-to-meta-mask>

As one of the most popular and established [cryptocurrency exchanges](#), Coinbase serves as an accessible route to cryptocurrencies for many users. But how can these users transfer crypto to their MetaMask wallet? MetaMask is an efficient crypto wallet that allows users to store cryptos in a secure ecosystem. It's one of the simplest hot wallets that is easy to set up and is ideal for users who trade crypto on a daily basis, yet gives them the freedom to own their own keys that cannot be exchanged.

For such users, it can be very difficult to transfer cryptocurrencies and store them in a secure wallet. So here is a complete guide of how to transfer crypto from Coinbase to MetaMask.

How do I Transfer Crypto From Coinbase to MetaMask?

To transfer from Coinbase to MetaMask, you need to follow these steps:

- Sign in to your Coinbase account.
- Log in to your MetaMask account and click on the three dots "Buy and Send".
- Every crypto has that address, so make sure you send it to the correct address. Example: Make sure you send [Bitcoin](#) to your Bitcoin address and [Ethereum](#) to your Ethereum address.
- Copy the MetaMask wallet address to the clipboard. Paste the address into the Coinbase wallet address field (please check your wallet address before sending).
- Enter the amount of cryptocurrency to send. It's a good idea to send a small amount first to test the functionality.
- When you're done, click the "Finish" button to complete the transaction.
- Transactions can take some time to process (Coinbase or MetaMask can occur during times of congestion, depending on congestion).
