# IMPT Has Raised \$10 Million - How to Profit from Early-Bird Pricing

Original:

<https://www.btcc.com/en-US/academy/research-analysis/impt-has-raised-10-million-how-to-profit-from-early-bird-pricing>

The [IMPT](#) presale market has surpassed \$10 million. As investor interest grows, the price of [IMPT](#), one of the market's most promising new coins, rises to new heights.

If you're looking for a coin to invest in this quarter, consider Impact Token.

## A Green Future

Impact Project (IMPT) is a blockchain-based eco-sustainability project that aims to assist individuals and businesses in safeguarding the earth while reaping financial benefits. IMPT functions as the ecosystem token for Impact Project.

Built on Ethereum, the Impact Project aims to streamline the process of purchasing carbon credits. Access to global eco-sustainability initiatives and programs is another feature of the platform. Investors can provide direct funding through the site.

The goal of the Impact Project is to demonstrate the potential benefits of blockchain technology in the battle against global warming. The IMPT token, its native currency, is an excellent choice for those looking to invest in sectors including ESG (environment, society, and government).

## As of Right Now, \$10 Million Has Been Raised

Impact token was initially sold at a pre-sale, a practice common among newly launched cryptocurrencies. Token presale was a success, bringing in \$10 million in just four weeks. As a result, Impact token is on course to raise over \$10.8 million in its first presale round, surpassing its initial goal of \$6.5 million.

The initial stage of IMPT's development, which was anticipated to end on November 25, is continuing well past the date that was predicted. At its current price of \$0.018, the token is close to reaching its presale goal, at which point the second stage, at a price of \$0.023, will commence.

## Affiliate Network IMPT Welcomes Amazon

The Impact Project's affiliate network is just one of its many attractive features. To far, the protocol has attracted over 25,000 members, including many of the world's most illustrious figures.

Last week, online retail behemoth Amazon.com Inc. became the latest member of the Impact Project's affiliate network, pledging to use the service to mitigate the effects of its operations on the environment. The corporation now counts Bloomingdale's Netflix, Microsoft, and Macy's as customers.

To participate in the affiliate program, businesses give back a percentage of their earnings made through the Impact Token network. They can set their own donation amounts, and users of the platform's widgets or apps can earn IMPT tokens for making purchases. Tokens earned can be traded in for carbon credits, which can be used in the battle against global warming.

The advertisement banner features a green background with a subtle grid pattern. At the top center is the BTCC logo, which consists of a white 'X' shape followed by the letters 'BTCC' in white. Below the logo, the text 'Level up your VIP status for more benefits' is written in a bold, yellow font. Underneath that, 'BTCC - Your preferred crypto futures exchange' is written in a smaller, white font. At the bottom of the banner, there are three main elements: on the left, a black button with white text that says 'Download our app now'; in the center, a black button with the Apple logo and the text 'Available on the App Store'; and on the right, a black button with the Google Play logo and the text 'GET IT ON Google Play'. To the right of the Google Play button, the text 'Support fiat and crypto deposits' is written in white. The banner is decorated with several floating coins: a blue coin with a white 'T' on the left, a purple coin with a white 'B' on the right, and a stack of gold coins with 'BTC' symbols at the bottom right.

## **How to Buy IMPT**

If you're an investor who wants to save the planet, you can get a discount on IMPT tokens right now. Here are some steps to help you get there:

### **1.Prepare Your Wallet**

Make a digital currency wallet first. Due to the nature of the green cryptocurrency as an ERC-20 token, the chosen wallet must support this token standard. We advise using MetaMask as your primary cryptocurrency wallet.

### **2.Invest in Digital Currency**

To acquire Impact tokens, investors must first acquire Ethereum (ETH) or Tether (USDT). You can buy or sell both of these assets on any major market or through any major broker.

The IMPT website now accepts Ethereum and USDT payments through a cooperation with payment processor Transak.

### **3.Join Your Bank Account**

To link your wallet with IMPT, just visit the main page and hit the "Connect Wallet" button. To link your wallet with the pre-sale platform, select a wallet type in the following box and then follow the on-screen instructions.

### **4.Invest in IMPT**

Investors can buy IMPT once a wallet has been linked. You can pay for this asset with either ETH or USDT, but you'll need at least 10 IMPT tokens to make a purchase.
