What is Linear Finance?

Linear Finance is a decentralized platform that allows users to instantly create digital versions of traditional assets called synthetic assets. These synthetic assets, known as “Liquids,” provide unlimited liquidity and give cryptocurrency users access to commodities, forex, market indices, and other sectors.

The exchange is specifically designed to enable the trading of various Liquids with rapid confirmation times.

Linear Finance offers different products, such as Linear.Buildr, which is a decentralized application (DApp) used to manage Liquids. Users can utilize Linear’s native token, LINA, and other tokens as collateral within the Linear.Buildr app. The platform also provides an exchange designed for efficient trading of various Liquids, ensuring fast transaction confirmations and strong security measures.

Purpose of Linear Finance

- The main goal of Linear is to deliver an exceptional user experience, focusing on scalability and faster transaction speeds.
- Linear Finance aims to provide a simple solution for users who want to access traditional assets while benefiting from blockchain technology.
- The protocol emphasizes cross-chain capabilities to enhance scalability and speed.

What makes Linear Finance unique?

- Linear Finance is built on Ethereum but supports other chains, allowing users to transfer assets between them.
- It offers access to both digital assets and traditional assets like forex and commodities through dynamic price feeds.
- Linear addresses the systemic front-running issue found in many decentralized exchange (DEX) protocols.
- LINA tokens are used as collateral to mint Liquids, but users can also use other digital assets like ETH and wBTC.
- The Linear Exchange provides unlimited liquidity for Liquids and fast settlement times, suitable for high-frequency traders and algorithmic trading.

Utility of LINA tokens

- LINA's primary use is as collateral for Liquids (using Buildr), which are synthetic assets on the Linear Finance platform. LINA has an estimated APY of 33.93% with over 1.15b staked.
- LINA tokens are also used for community governance of the protocol.
- Token holders have access to the Linear DAO. The Linear DAO allows token holders to vote on various initiatives and proposals.

Altogether, Linear Finance seems to be a good investment opportunity.

Linear Finance Latest News

- A Twitter account recently tweeted that a whale is doing a pump-and-dump. The address which has been pushing the price is "0xd91A43744B7A355A4bb061bdba9F49B4C78920de". The whale has been buying and selling Lina from the Binance exchange. The address has withdrawn over 1.2 Billion tokens from exchanges via multiple addresses. It has over 23% of the circulating supply and 12% of the total supply. The address has also sold a few of the tokens which have dumped the price.

Linear Finance Price Analysis

LINA price has defied gravity in the past few days as its rally gains steam.

At the time of writing, LINA is trading at \$0.02158 with a market capitalization of \$115,354,099, ranking #191 amongst all cryptocurrencies by that metric. In the past 24 hours, the LINA coin price has increased by 0.50% with a trading volume of \$290,555,220.

This week, Linear Finance coin managed to move above the important resistance point at \$0.0194, the highest point on April 6.

LINA price has seen a gain of more than 100% in the past seven days, suggesting an extremely strong bullish trend. In all, the token has jumped by more than 300% from the lowest point this year.

It is unclear why LINA price has surged in the past few days. A likely reason is that the volume of trades in the ecosystem is doing well, with the TVL surging to over \$17 million. It was about \$5 million at its lowest level in 2022.

The other reason is that the token is gaining traction in social media. Data from LunaCrush shows that it is one of the most actively mentioned projects on social media. Historically, cryptocurrencies that are mentioned in platforms like Twitter, Reddit, and StockTwits tend to do well.

The same is happening in CoinMarketCap, one of the biggest crypto websites in the industry. Together with \$TOMO, \$OXBT, \$HEX, and \$BIAO, LINA is one of the top trending coins in the platform.

Our LINA price analysis shows that the overall sentiment of the technical indicators is bullish. Linear price could potentially see a new high in the coming weeks.

The next level to watch will be at \$0.030, which is ~40% above the current level. The upside trend of LINA can see a halt near this area.

Meanwhile, the support of the asset price can be seen near the value of \$0.017. A drop below \$0.017 will invalidate the bullish view.

Now let's move on to the LINA coin price prediction for 2023 and beyond.

LINA Price Prediction 2023, 2025, 2030

Below pulls together our LINA price prediction for 2023, 2025 and 2030, ensuring you have a rough idea of the coin's future value potential:

YEAR	MINIMUM PRICE	MAXIMUM PRICE
2023	\$0.026	\$0.028
2025	\$0.065	\$0.081
2030	\$0.167	\$0.182

Linear Finance Price Prediction 2023

If the platform welcomes a thriving userbase and a spike in the rate of adoptions and collaborations, LINA might see impressive growth throughout 2023.

As per our Linear Finance price prediction 2023, Linear Finance is expected to reach a possible high of \$0.034 by the end of 2023. On the flip side, if Linear fails to commit to its expectations, the price might slip down to \$0.026, with an average price of \$0.028.

Linear Finance Price Prediction 2025

Linear Finance looks well-positioned to reach its full potential in the coming years. If Linear Finance manages to attract investors and whalestats with its developmental and community-building initiatives, LINA crypto price might experience a significant increase in 2025.

Our Linear Finance price prediction 2025 forecasts that at the very highest, Linear Finance price may reach \$0.081 by 2025. The minimum price could be \$0.065, with an average price of \$0.068.

Linear Finance Price Prediction 2030

The Linear Finance ecosystem is actively growing with new users and partnerships and will remain viable in the long term. Our Linear Finance price prediction 2030 forecasts that Linear Finance is expected to trade between \$0.167 and \$0.182 in 2030.

Here, it's worth pointing out that 2030 is still a long way away. 7 years down the line, the crypto market could be affected by a host of different events and updates, each of which is difficult to ascertain. Ergo, it's best that predictions like these are taken with a pinch of salt.

Where Can I Buy LINA?

Notable options for purchasing LINA include Binance, BTCC and KuCoin. Among these, [BTCC](#) is one of the best exchanges as it witnesses a large trading volume of LINA. Compared to Binance, BTCC has no regulatory concerns and is available in U.S., Canada and many other countries in Europe. Furthermore, [BTCC exchange](#) is highly recommended due to its favourable attributes such as extremely low fees, user-friendly interface, excellent customer support, and robust security measures with no reported hacks or security breaches to date.

In order to trade [LINA/USDT](#) on [BTCC](#), you need to first [register](#) an account. And you need to have some USDT in your crypto wallet, or you can directly [buy](#) it on BTCC. Once you have USDT, you can trade [LINAUSDT Perpetual Contracts](#) on BTCC with a leverage up to 50x. The transaction is safe, cheap, and fast with VERY easy steps. You can also choose to deposit [LINA](#) with a minimum single deposit of 16149LINA.
