Smart contracts are code that runs at the “top” of the blockchain and will be executed when specific conditions are met. They can make decisions, distribute profits, and perform other tasks.

What is the difference between Dao and general limited liability company?

A normal limited liability company is managed by one or more human owners, known as “members”. These members will make all decisions for the enterprise and have the final decision on all business matters. Dao is usually managed by an algorithm, although it can also have human members.

How to Build a Dao?

You can set up Dao online or via email. This is a relatively simple process. Go to this link, follow the instructions, then select limited liability company, and then select Dao as “additional designation” from the drop-down list. If you want to register by mail, you need to send the Dao form together with a check or money order.
