## About Netflix Inc

American IT firm Netflix Inc. specializes in online video distribution, subscription television, and video streaming. Initially, the business was a full-fledged streaming service with a catalog of movies and TV shows made available via licensing agreements. Now, in addition to its core business of providing streaming services, Netflix is also a production firm, creating original content under the moniker Netflix Originals.

Reed Hastings and Marc Randolph started Netflix on August 29, 1997. It's based out of Los Gatos, California, and it provides services all around the world with the exception of China proper, North Korea, Iran, Crimea, and Syria. Roughly 223 million people throughout the world are currently paying members. It produces and distributes movies, as well as creates and distributes television shows in more than 35 languages.

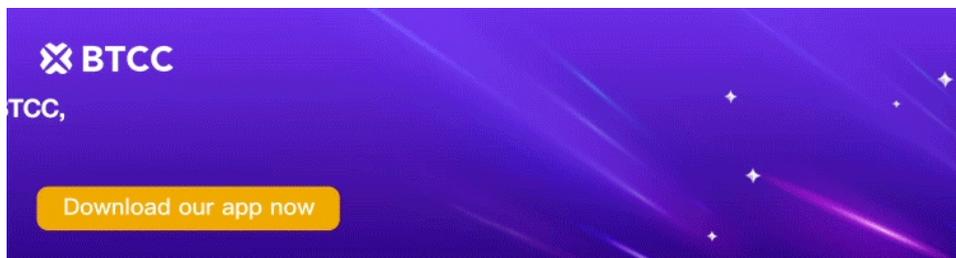

Netflix's meteoric rise to prominence in recent years can be attributed, in part, to the fact that its content is readily available to members no matter where they may be. The streaming service is accessible via web browsers on personal computers and apps downloaded and installed on a wide variety of mobile devices, including smartphones, smart TVs, tablets, Blu-ray Disc players, digital media players, video game consoles, and virtual reality headsets.

Netflix functions in the tech industry, the entertainment industry, and the media industry. Presently, it operates a number of wholly owned companies, including Netflix Pictures, Netflix Studios, Netflix Animations, DVD Netflix, Millarworld, StoryBots, Inc., Broke and Bones, Night School Studio, Grauman's Egyptian Theater, Roald Dahl Story, Albuquerque Studios, and others.

It is worth noting that in 2021, Netflix was recognized as the ninth most trustworthy brand in the world by Morning Consult. You may also find it intriguing to learn that Netflix was the best-performing stock in the S&P 500 stock market index throughout the whole decade of the 2010s.

## **Is Netflix (NFLX) Stock a Good Investment?**

Given what we've covered, it's clear that Netflix is a great business and that its stock has done well over the years. The stock price had a fantastic year in 2018, and it looks like 2020 will be just as good. The Netflix stock price increased at a faster rate than ever in 2021. The company has provided excellent returns for its early backers.

We don't think the recent slump in NFLX's stock price will last for very long. We anticipate a recovery in the stock price and are confident that new investors will profit greatly from the next bull market. There is no reason not to invest in Netflix if you so desire.

You also can't forget that there is a degree of risk involved in trading stocks. Therefore, there are potential dangers associated with Netflix stock. But it's a lot more secure than crypto or most other investing options. Quite the opposite, it appears to be a safe investment for the future.
