Crypto inventors know that to be on top of their game, they must keep up with the fast-moving market. They are always looking out for the next big thing because they know new tokens, especially undiscovered gems, might be the turning point for their portfolio. One new presale token, Pikamoon (PIKA), might be the token that can turn around your portfolio, especially in this bear market. In this article, we'll dive into the Pikamoon price prediction for 2023, 2025 and 2030, and its potential prospects as a long-term investment.

With a focus on photorealism and fun, Pikamoon is a new Metaverse game with the goal of creating a unique Player-vs-Environment (PVE) game.

Pikamoon's presale was originally launched in March 2023 with three stages. The PIKA token is currently selling for as little as \$0.0006 in the third and last round of the presale. This came after a price of \$0.0004 in the second round of the presale. The **Launch Price** is set at **\$0.0007**. This means it is expected to give presale investors an astonishing return by the time it launches.

Pikamoon Price Prediction - Story Highlights

While it's difficult to make a Pikamoon price prediction as it hasn't no historical price performance yet, these are some potential forecasts for the PIKA coin price:

End of 2024: Following a fruitful presale, Pikamoon plans to provide investors with skyrocketing returns. However, Pikamoon's value may retrace to test demand even if the first marketing balloons PIKA's price following the months after the TGE, because a post ICO dump commonly occurs. On the other hand, new participants often "buy the dip," causing a token to enter price discovery and reach new heights, provided the project sticks to its roadmap.

End of 2025: How the crypto gaming performs in 2025 will depend on marketing and gameplay. Despite the strong competition, Pikamoon may manage to capture a slice of its market share. According to our Pikamoon price prediction 2025, at the very highest, Pikamoon price may go up to \$0.0013 by the end of 2025. The minimum price could be \$0.00099.

End of 2030: 2030 could see more adoption for the wider crypto ecosystem. Regulations will likely be formulated that push new assets in a progressive direction. GameFi tokens like PIKA would benefit from that. Another catalyzing factor would be the demand for more P2E games with good gameplay. Pikamoon, at least from what's written in its whitepaper, is trying to achieve that. If it does, it might reach \$0.002 by the end of 2030.

Pikamoon Presale Details

Pikamoon is currently in phase 3 of its presale, where its price is \$0.0006. The token has raised \$3,000,000 at the time of writing.

The presale has been divided into three phases. Only 30% of the total supply of 50 billion tokens is available for purchase during the presale.

Presale Phase	Distribution	Tokens	Token price
Round 1	10%	5,000,000,000	\$0.0002
Round 2	10%	5,000,000,000	\$0.0004
Round 3	10%	5,000,000,000	\$0.0006

The Pikamoon team have dedicated a total of 15 billion tokens to the presale. 7.5% is for the liquidity pool, 10% is reserved to power the reward system, 12.5% of the tokens is with the team, 8% is for marketing, and 32% of the tokens are for developing the ecosystem.

Pikamoon has employed a transaction tax on sell orders. It is a 2.55 tax, 1% of which will go towards ecosystem developments, the other 1% will go into marketing, and the remaining 0.5% will be burned.

Burning is a token deflation technique meant to decrease PIKA's supply and increase its value.

Pikamoon has set a realistic target of \$6 million - which is in line with some of the leading new cryptocurrency projects. But the current pace at which it is going might make reaching this target take several more weeks.

Presale Started	March 2023
Purchase Methods	USD, ETH, or Card
Chain	Ethereum
Hard Cap	\$6 million
Listing Price	\$0.0007

What Will Affect the Pikamoon Price?

Pikamoon is currently still under presale, and its performance on exchanges when listing day comes will determine its price. That said, no listing has been announced so far.

Pikamoon will roll out free NFTs for token holders. NFTs come with four playing tiers and will only be available for token holders. The performance of these NFTs on the NFT marketplace will be the second deciding factor for Pikamoon.

Other catalyzing factors would include marketing and the general interest Pikamoon is able to generate among the crypto community.

Although Pikamoon has gained traction in the past month, Google Bard (a popular AI chatbot similar to ChatGPT) says how well the token performs lies on the success of the metaverse development team.

As we know, Pikamoon is a GameFi project building a play-to-earn metaverse. To this point, there have not been any games launched in the metaverse, limiting the usage of Pikamoon tokens.

According to Bard, for the price of Pikamoon to rise, there has to be increased adoption by the wider

crypto community. In other words, the Pikamoon development team has work to do for the price of its token to compete with other similar companies.

Now let's move on to the detailed Pikamoon price prediction for 2023 and beyond.

Pikamoon Price Prediction 2024

Play to earn cryptocurrency hasn't been very consistent the last 12 months. P2E games have begun to receive a terrible reputation due to the bear market of 2022 and other negative elements, such as an emphasis on earning mechanics rather than gameplay.

Pikamoon, with its "photo-realistic" approach to the metaverse, is one of the few innovative projects trying to address this problem. The official whitepaper envisions a vibrant metaverse.

In the aforementioned video, Jacob Bury Crypto highlights further benefits of this initiative, which include:

- A strong roadmap
- Beautiful gameplay
- The mechanics of GameFi and DeFi are currently expanding.
- Project Verified and Audited

In 2024, these elements ought to contribute favourably to Pikamoon's expansion. The cliff periods that follow TGE and prohibit early-stage investors from immediately retrieving their tokens after the ICO concludes would be another catalyst.

But there's still a chance for a retracement, which would drive PIKA's price lower before rising to its stage 3 presale price of \$0.0006.

Pikamoon Price Prediction 2025

Pikamoon will proceed with its program in 2025. It will also grow closer to competing with companies like Axie Infinity the closer it gets to producing its own game. It could be challenging for it to go against a well-established project like Axie Infinity, though, as that would necessitate a parabolic climb.

Additionally, a more conservative estimate for the price of PIKA by the end of 2025 is \$0.0005, given that Pikamoon currently lacks the virality of meme coins.

Pikamoon Price Prediction 2030

Hopefully, 2030 will bring greater order to the chaotic cryptocurrency scene. This will guarantee the rise of further utility-based tokens, such as Pikamoon. A potential contributing aspect to PIKA's expansion could be its gameplay. Should PIKA's gameplay prove to be more captivating than that of Axie Infinity, it may have significant room for expansion.

It would still be challenging to flip Axie Infinity, though, as it would need a parabolic growth of 120,000% from PIKA's 2025 highs. Though meme coins like Pepe (PEPE) had experienced comparable success in 2023, the price rise of AXS token during the most recent cryptocurrency bull run may have been an exception for play to gain tokens.

What is Pikamoon? The Ultimate Metaverse Gaming Experience

Pikamoon is a unique Play-to-Earn (P2E) game set to revolutionize the crypto industry. The project takes direct inspiration from the game series Pokemon in an attempt to provide a metaverse, where users can capture Pikamoons and battle them across the Pikaverse.

Pikamoon not only promises the ultimate Metaverse gaming experience, but is steadily developing it.

Its token, \$PIKA, is a meme token too. But it's a better investment opportunity than Pepe (PEPE). How? \$PIKA is a hybrid GameFi meme token that powers the Pikamoon gaming system. So, it allows investors to enjoy the benefits of meme tokens while investing in actual utility.

While [Pepe \(PEPE\)](#) is built around hype and fanfare, Pikamoon (PIKA) offers investors a chance to be part of the future by directly investing in the metaverse through its token. Pikamoon's unique earning model, enjoyable storyline, and captivating graphics make it stand out from other metaverses.

Pikaverse Explained

Pikaverse is a metaverse comprised of four lands where players capture Pikamoons to Battle monsters and go up against the dark gods ruling and destroying these lands.

Your goal in the game is to travel across four lands of Pikaverse and defeat their respective rulers.

The game and the characters have taken direct inspiration from Pokemon, and each "Pikamoon" is reminiscent of a pocket monster. And like Pokemon, Pikamoon will also feature turn-based combat.

With each turn, you will be given a chance to attack or heal. And each win will give your Pikamoon experience points. You can use these points to upgrade your Pikamoon or buy in-game assets from the Pikamoon marketplace.

The marketplace relies on \$PIKA tokens and will feature products like.

1. Items
2. Healing items
3. Capture devices
4. Boosts
5. Treats
6. Traveler Card

How to Buy Pikamoon - A Step-by-Step Guide

For investors that opt to buy Pikamoon tokens the steps are:

Step 1 - Set up a Web 3 Compatible Wallet

The first step is to set up a Web 3 compatible wallet. Pikamoon recommends Metamask.

Step 2 - Buy ETH

ETH must be used to swap for PIKA tokens. So, make sure you have enough ETH tokens in your wallet. Check [here](#) to buy [ETH](#) with simple steps and extremely low fees. For those who don't want to purchase Ethereum tokens, "buy crypto with card" is also an option.

Step 3 - Go to the Official Website

Go to the official website - Pikamoon.io - and connect your wallet.

Step 4 - Buy PIKA Tokens

The final step is swapping ETH for PIKA tokens. The tokens can be claimed after the cliff period post-TGE is finished.

Conclusion: Is Pikamoon a Good Investment?

Pikamoon has promised excellence for the crypto ecosystem. And it has been covered by most major crypto publications.

This project is trying to offer a photorealistic metaverse inspired by Pikamoon. That is a good premise - and something that's needed for the crypto ecosystem. But we are yet to see anything beyond some in-game images that it has posted on its official Twitter page.

That said, P2E games that play on nostalgic factors are few - and if Pikamoon is able to deliver, it may perform in the same way as other similar top projects.
