Ripple crypto price prediction: Ripple (XRP) price looks to be rising across the rest of the crypto market. The increasing market support has sent Ripple up 1.8% in the last 24 hours. Nevertheless, XRP is still 68% lower year-to-date (YTD). Positive developments around XRP, on the other hand, could spark buyer support.

Ripple Crypto Price Prediction: XRP Sees Rebound Signal in Positive Developments

One of the factors that caused XRP prices to plummet in late 2021 was a lawsuit filed by the U.S. Securities and Exchange Commission (SEC) against Ripple and its executives for selling unregistered securities. The case has dragged on for nearly two years, and Ripple has been winning narrowly.

On Sunday, Judge Sarah Netburn granted Ripple's motion to serve two subpoenas to verify the authenticity of seven videos of SEC officials making public statements. The videos could add strength to Ripple's case with the commission. There is no clear indication yet that Ripple will win the case, however, as the SEC still maintains that XR is a security token.

The other good news for Ripple is that it has been acknowledged as one of the top growing companies in the U.S. Ripple ranks as the 2,456th fastest growing firm, up 236% in one year.

Despite these positive developments, however, Ripple's XRP has failed to witness the overwhelming demand that could help it close the year-to-date loss gap. As a result, cryptocurrency investors are looking for better-performing cryptocurrencies that will deliver lucrative returns in the coming months. One of these cryptocurrencies is [Tamadoge \(TAMA\)](#), one of the hottest play-to-earn meme coins on presale.

Tamadoge Is Going to Make Great Returns

Tamadoge combines the best of crypto & metaverse game space, which is an NFT-based play-to-earn meme coin. Tamadoge ecosystem allows players to mint, breed, train and battle their Tamadoge NFTs against each other, after which they can climb the leaderboard and be rewarded with TAMA tokens. That is, Tamadoge enables holders to earn for the time they spend playing the game, or for the time they spend with their Tamadoge NFT pets, in other words.

TAMA aims to become the best meme coin on the market by leveraging the power of the “Doge” community. Meme coins are common among retail traders, but the two largest coins, [DOGE](#) and [SHIB](#), have had some weaknesses that have prevented them from reaching new heights this year.

Tamadoge offers a utility that other meme coins lack. Its upcoming NFT-based crypto game is expected to trigger demand and revenue for TAMA. Tamadoge crypto ecosystem also offers a variety of mini-games, not just a card game, which helps maintain player engagement.

Tamadoge has taken a unique approach to being one of the best crypto gaming ecosystems with multiple rewards for players to participate. Its [presale](#) has sold out much faster than initially expected and is nearing completion of its third tranche, having already raised more than \$4.7 million at the time of writing.

The presale phase offers discounted prices and will run until September 2, 2022. Early investors can buy Tamadoge (TAMA) with USDT, Ether, or fiat currency.
