What is Shentu (CTK)?

Shentu Chain, formerly known as CertiK Chain, is a Delegated Proof-of-Stake (DPoS) blockchain built with the Cosmos SDK. It aims to be the pillar of support and security for blockchain infrastructure and decentralized applications (dApps) by protecting from attacks and reimbursing lost or stolen cryptocurrency of any blockchain network.

The Shentu Chain ecosystem consists of four key components:

- **Security Oracle:** Powered by a decentralized network of security operators, it guards on-chain transactions and prevents decentralized finance (DeFi) projects from malicious attacks via real-time security checks.
- **ShentuShield:** Provides decentralized reimbursements of lost or stolen crypto assets of any blockchain network due to security issues.
- **DeepSEA:** A secure programming language and compiler toolchain for secure smart contract development, allowing developers to handle extremely complex code while formally verifying through the Coq proof assistant. It is backed by the Ethereum Foundation, Columbia-IBM, and the Qtum Foundation.
- **Shentu Virtual Machine (SVM):** SVM allows users to access, analyze, and include smart contract and blockchain security information. This is fully compatible with Ethereum Virtual Machine (EVM) and is directly used by DeepSEA.

CTK is the native digital cryptographically-secured utility token of the Shentu Chain. Assisting the execution and implementation of transactions, the token serves as the core utility for on-chain functionalities such as operating the Security Oracle and ShentuShield systems.

The CTK token ensures a reduction in gas consumption with better value, distribution of power within the community, and more rewards and staking opportunities.

Shentu's Evolution: Rebranding of CertiK as Shentu

Origination: With an aim to secure the Web3 world, CertiK was founded in 2018 by professors from Yale University and Columbia University.

As a pioneer and one of the fastest-growing and most trusted companies in blockchain security, CertiK leverages top-notch AI technology to protect and keep track of blockchain protocols and smart contracts.

Success: From academia to enterprise, CertiK features highly advanced innovations, allowing vital applications to scale with safety and accuracy. The company is backed by Sequoia, Coinbase Ventures, Binance, Shunwei Capital, Goldman Sachs, and more.

Until now, CertiK has worked with over 3,700 enterprise clients, secured over \$310 billion worth of digital assets, and has detected over 60,000 vulnerabilities in blockchain code.

Progress: In October of 2020, the mainnet of CertiK Chain, a public blockchain platform, was launched. It was based on the CertiK Foundation's formal verification security system and was created to improve the security of smart contracts.

Within a brief period, the CertiK Chain was rebranded as the Shentu Chain in August 2021, which remains as a massive improvement to the former.
