Shibarium Release Date - A Closer Look at the Shiba Inu Coin Layer-2

Original:

<https://www.btcc.com/en-US/academy/research-analysis/shibarium-release-date-a-closer-look-at-the-shiba-inu-coin-layer-2>

Can you tell me when Shibarium will be available for purchase? In regards to Shibarium Layer-2, the [Shiba](#) community has focused much of their attention on the SHIB initiatives. Both SHIB: The [Metaverse](#) and the Shiba Inu video game will contribute to the expansion of the Shiba Inu ecosystem and help to create a robust system.

However, Shibarium will find applications in many more fields. Now that we've got all the info, let's see what Layer-2 has in store for the ShibArmy. Learn more about Shibarium and when it will be released here.

Shibarium, Explained

To put it simply, Shibarium is a layer-2/blockchain solution. Ryoshi, creator of the Shiba Inu Coin, first unveiled it to the general world. When L2 is functional again, SHIB tokens will be transferred there. Even though Ryoshi coined the term "blockchain," Shibarium is most likely a layer 2 (L2) built atop an existing blockchain (Ethereum).

The creator of SHIB said, "The border between an L2 and own blockchain is thin," in a now-deleted blog post. In comparison to Matic L2, what is the difference between BSC?

There will not be a new cryptocurrency based on Shiba Inus just because of the name "Shibarium," nor is it a part of its blockchain. Shiba Inu will continue to make use of Ethereum. Reduced transaction costs within the Shiba ecosystem is a key objective of this initiative. Approved in seconds for pennies," the Unification developers wrote on their blog.

And this Ole fren is why we are working on [#SHIBARIUM](#). <https://t.co/FtxzaXME5Y>

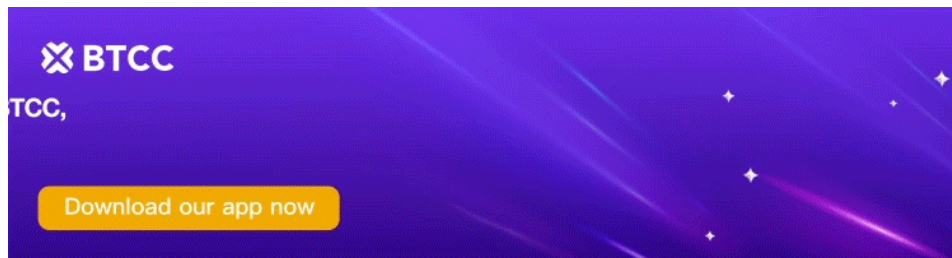

— Shytoshi Kusama™ (@ShytoshiKusama) [October 15, 2021](#)

Initially, Ryoshi claimed that Shibarium's transaction fees would be close to nothing. The head of the Shiba Project, Shytoshi Kusama, has made the following statement on the Shiba Discord: "Shibarium will have low rates for any service, game, or other things that are developed on it."

Ethereum's inflated gas prices are a major drawback. Due to Shiba's heavy dependency on the Ethereum network, gas prices spiked when Shiboshi NFTs were released. Shytoshi tweeted on the advantages of the L2 when everyone grumbled about Shiboshi's release.

Layer-2 will use similar processes to those used in other projects to burn SHIBs. A sneak peek at the Shibarium suggests it might be used to travel to far-flung biomes.

The L2 will soon be the focus of a Shibarium Hackathon, wherein other developers will have the opportunity to build upon the L2. A prize of cash, according to Shytoshi, will be awarded to the winning teams so that they can develop novel Shibarium-based products and services.

Shibarium Release Date

The exact time of Shibarium's release is currently uncertain, however it could happen as early as the middle of 2022. Shibarium's potential release date overlaps with Unification's scheduled mainnet upgrade in June. An update to Unification and Sound's mainnet could facilitate the use of SHIB L2 after they finish developing Shibarium.

Leader of the Shiba faction Shytoshi Kusama predicted its arrival in late April as "quite near." The documentation for Shibarium, which according to Shytoshi will be a new blog post, will be released shortly.

Kaal Dhairya, creator of Shibarium, said on Twitter that the public would be able to try out the game's alpha build very soon. For the sake of the fans, the project doesn't specify when Shibarium will be released, according to Queenie, the moderator of the Shiba Inu AMA. She said, "Yes," when I asked if she thought it will be finished by 2022.

The other supposed release dates all point to this one as the most plausible. It was in September of 2021 when Shytoshi hypothesized Shibarium would reach its developmental peak. The Shiba team assured the public that layer-2 will be released in 2022 in a March blog post.

Are There Plans to Implement SHIB at Shibarium?

The SHIB and LEASH tokens may be more practical for usage in ShibaSwap at the moment, but they will not be the primary pair token for Shibarium. Instead, BONE will be used.

In his defense, Ryoshi said, "BONE will get off to a fair and "0" start, so we won't have to worry about whale bags."

BONE was given to SHIB and LEASH owners at the beginning of ShibaSwap, so there are likely to be a lot of BONE whales.

Special Announcement: [\\$BONE](#) is confirmed as the token that will be used as gas in [#Shibarium](#). [#ShibArmy](#) [#ShibAMA](#)

— Shib (@Shibtoken) [December 30, 2021](#)

According to Unification's sneak peek, Shibarium validators will be able to acquire BONE with Shibarium. The Shiba Inu DAO voted to prevent ShibaSwap from producing a new BONE in order to acquire this BONE. The DEX, on the other hand, will soon be offering incentives in the form of the new TREAT token.

Despite BONE's inclusion in Ryoshi's original blueprint, some users were dissatisfied when its involvement in the L2 was confirmed in the December SHIB AMA.
