SPACE ID was established as a universal name service network to accommodate the growing need for decentralized identifiers and other Web3 name services. These decentralized identities have proven to be a crucial component of the revolutionary Web3 age, since they can be utilized across a

variety of dApps and blockchain networks.

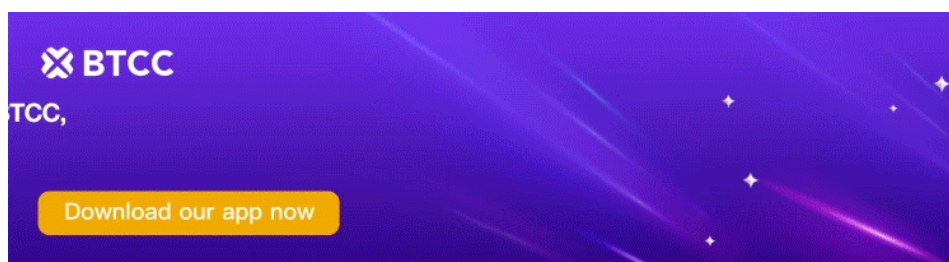

Discover, register, trade, and administer web3 domains all in one place with SPACE ID, an all-in-one domain and identity platform. SPACE ID explains that in addition to a multi-chain name service, this name service network will include a web3 name SDK and API for programmers.

Using an ad hoc blockchain dubbed "Lucas," SPACE IDs makes it simple for its customers to create bridges between different blockchains and keep their data in a one place. Additionally, the SPACE ID protocol allows for the introduction of community-created custom top-level domains (TLDs), such as the .eth, .bnb, and .arb extensions.

It will use the SPACE ID DAO to manage its infrastructure and protocols. ID, the SPACE ID ecosystem's native token, may be used for staking, payments, and voting. In addition, ID facilitates the usage of the numerous SPACE ID ecosystem services and the management of users' digital identities.

SPACE ID (ID) Price Prediction 2023

If you look at the chart closely, you'll see that ID's candlesticks are currently hovering above the 200 MA, indicating a bullish feeling. The upper band of the regression trend has been evaluated five times by ID as well. ID's upward tendency is further supported by the Regression trend. As ID approaches the upper band, it forms a new, higher low, and continues its ascent.

ID's recent price movement is consistent with the regression trend, even as the candlesticks' distance from the 200MA increases. The price may break over the Resistance area (\$0.5195) if the ID maintains its current direction within the Regression Trend area. However, if the price trend were to reverse, ID might fall to the Support level (\$0.4323).

ID's price is now trending upward and has the potential to break through the \$1 Resistance in 2023. Nonetheless, if ID experiences a trend reversal and subsequently enters the bear trap, the price may drop to the \$0.3 support area.

SPACE ID (ID) Price Prediction 2024

Since the Bitcoin halving is predicted to occur in 2024, investors view this year as potentially momentous for the cryptocurrency market. Traders have noticed that anytime BTC goes up, cryptocurrencies also go up. By 2024's conclusion, the ID price may have risen above the \$3.15 level that Bitcoin reached after the halving.

SPACE ID (ID) Price Prediction 2025

Despite the fact that Bitcoin's price will have doubled by 2024, ID may still feel the aftershocks of the event. Many market watchers believe that the BTC halving will have a significant effect on the cryptocurrency industry. In addition, in 2025, ID will continue to increase, forming new resistance levels, just like many alternative cryptocurrencies. ID is anticipated to sell at a price greater than \$5.56.

SPACE ID (ID) Price Prediction 2030

ID and many cryptocurrencies may exhibit symptoms of consolidation and trade sideways for some time, while seeing tiny jumps, after witnessing a bullish run in the market. Therefore, ID might be worth \$10.75 by the year 2030's end.

Will SPACE ID (ID) Hit \$10?

To get to \$10, the price of a single SPACE ID token would need to increase by a factor of almost 22.22. After its debut, the ID token peaked in value at \$0.6 in March of 2023. Furthermore, it doubled from its lowest value of \$0.3 in only a month.

Since SPACE ID doubled in value in just one month, we can safely predict that it will hit \$10 within the next 12 months. Due to poor market conditions, however, that value is unlikely to be reached within the estimated time frame. Further, in order to indicate future growth, the SPACE ID token will need to expand its use cases.
