## Tamadoge to List on OKX Exchange - TAMA May Explode 100x By 2023

Original:

<https://www.btcc.com/en-US/academy/research-analysis/tamadoge-to-list-on-okx-exchange-tama-may-explode-100x-by-2023>

This week, OKX, the second-ranked [crypto exchange](#) in CoinGecko's trust score rankings, will host a spectacular ICO for [Tamadoge](#) (TAMA).

OKX has announced that they will be adding support for the TAMA/USDT trading pair on Tuesday, September 27 at 11:00 UTC. [Tamadoge](#) will also be available on OKX's decentralized exchange (DEX) on the same day at 17:00 UTC.

### The Next Big Thing in Cryptocurrencies

Tamadoge's presale ended earlier this quarter, and the coin will be launched for the first time on OKX, an exchange that now features more than 350 different cryptos.

Even though it was planned to go until the end of Q4 2022, the presale ended up earning \$19 million in less than eight weeks, making it one of the year's most talked-about token sales.

### In the News Media

Augusta Free Press, BeInCrypto, Bitcoinist, CoinPedia, CNBC, Cryptonews, EconomyWatch, InsideBitcoins, Outlook India, The Cryptonomist, The Economic Times, The Tech Report, U.Today, Yahoo Finance, Washington City Paper, and ZyCrypto were just some of the publications that

covered the news about Tamadoge.

Among the most recent reviewers are Pro Game Guides and Capital.com, a top online broker for foreign exchange and stocks.

## Purchased Volume

In the last hours of the presale, crypto investors in Discord groups placed buy orders for as much as 55.8 ETH at a TAMA price of \$0.03.

The initial exchange offering (IEO) listing price will similarly be \$0.05, therefore the high demand seen so far may continue throughout the sale.

Investors with a lot of money, known as “whales,” who bought TAMA at its lowest price ever (\$0.01) in the beta sale are expected to hang onto their shares for a substantial profit (ROI).

## Tamadoge Tokenomics

Tamadoge is a meme coin and play-to-earn crypto asset that may be used as the in-game currency for a new NFT-based metaverse game in which players take care of digital pets from infancy all the way through adulthood.

Good morning, [#TamadogeArmy](#)! ✨

Comment below why [#Tamadoge](#) is the best [#memecoin](#) of 2022? ↓

— TAMADOGE (@Tamadogecoin) [September 12, 2022](#)

As a deflationary mechanism, 5% of the transaction fee is burned whenever a player uses TAMA to purchase in-game pet food or accessories, reducing the total number of circulating TAMA tokens by 2%. TAMA is an ERC-20 token with a maximum supply of 2 billion coins.

When compared to other meme coins, such as Shiba Inu and Dogecoin, its clear use case and fixed supply may allow for more sustained price growth in the long run. This would mean that the asset would not experience the ‘pump and dump’ price action and deep retracement that has plagued other digital currencies in the past year.

# Transparency

The Tamadoge project had its legality as a cryptocurrency and its smart contracts verified by independent third-party services Solid Proof Audit and CoinSniper KYC before its presale began.

We are happy to announce that we have completed the smart contract audit for [@Tamadogecoin](#)

— SolidProof.io Official (@SolidProof\_io) [August 10, 2022](#)

Next, the Tamadoge team members were introduced, with bios appearing on tamadoge.io and in the project's accompanying whitepaper.

E.ric Lamontagne, a seasoned full-stack Web3 developer, joins the likes of Carl Dawkins, Thomas Seabrook, Neil Palethorpe, Siphamandla Mjoli, and others.

Carl Dawkins, head of growth, uploads an AMA session to the Tamadoge YouTube channel every week; the latest one was posted today.

## Exchange Listings

When it comes to cryptocurrency exchange listings, Tamadoge isn't stopping with OKX and its DEX; other platforms will be added in the coming weeks. OKX's 24-hour trading volume regularly ranges between \$1.3 and \$2 billion, making it the largest centralized exchange to declare an initial exchange offering to date.
