Terra Classic (LUNC). Explained

[Cryptocurrency](#) enthusiasts will never forget about Terra Classic (LUNC). The wild devaluation of this coin is a main cause of the bear market's devastating events in 2022.

Do Kwon's Terraform Labs launched Terra Classic (LUNC) in 2019. A proof-of-stake (PoS) blockchain built on Cosmos SDK and Tendermint was introduced as Terra Classic, an older version of the Terra network. The Terra ecosystem's decentralized stablecoins were backed by LUNC, which served as a collateral token. Terra's algorithmic stablecoin, Terra ClassicUSD (USTC), was backed by LUNC.

After then, Do Kwon and the Terra team devised a new blockchain without the algo-stablecoin and released Terra(LUNA) as a new coin to reclaim their position in the market .

Terra Classic (LUNC) Price Forecast in 2022

In the following paragraphs, the Terra Classic (LUNC) price forecast for 2022 is shown in a daily time frame.

Source: Tradingview

Terra Classic (LUNC(chart))'s above) bottom has rounded out. Price motions generate a bow-like pattern, which is known as the saucer bottom pattern because of this. A long-term price reversal is typically indicated by a rounded bottom pattern. This pattern also highlights the shift from a negative to a positive market sentiment.

In general, investors need to exercise caution and good market timing. A confirmed positive trajectory will be established if the price breaks through the barrier level.

Terra Classic (LUNC) is now trading at \$0.00011657. There is a possibility that the price of LUNC will rise to \$0.0061543 if the current trend continues. A drop to \$0.00004646 in LUNC's price is possible if the trend shifts.

Terra Classic (LUNC) Price Forecast— RVOL, MA, and RSI

Source: Tradingview

The following graph displays Terra Classic's RVOL (Relative Volume). An indicator of how trading volume has changed over time for traders. Right now, LUNC's RVOL is below the cutoff line, indicating that the current trend has extremely weak participation.

Additionally, the Terra Classic (LUNC) Moving Average (MA) is represented in the preceding chart. For the time being, the price of LUNC is above the short-term 50 MA, indicating a strong rising trend. LUNC's current sentiment is optimistic. At any given moment, LUNC's trend could reverse.

The LUNC's RSI (relative strength index) is at 55.81. There is a high probability that LUNC is nearing overbought territory. If the RSI rises above 70, the indicator will be considered overbought. As a result, traders may feel more comfortable engaging in transactions.

Terra Classic (LUNC) Price Forecast in 2023

Terra Classic (LUNC) could reach \$0.7 by 2023 if the decline in price momentum entirely slows

down and the trend reverses.
