## Terra Classic (LUNC) Price Forecast: LUNC to Zero, Tamadoge Reach \$1

Original:

<https://www.btcc.com/en-US/academy/research-analysis/terra-classic-lunc-price-forecast-lunc-to-zero-tamadoge-reach-1>

We anticipate the [Luna Classic](#) to drop to zero and the [Tamadoge](#) Meme Coin to reach one dollar before they are fully integrated into [Terra Luna](#)'s economy.

In May of this year, the Terra Luna ecosystem failed, prompting Terraform labs to reorganize the system. Both the original Terra network and the LUNA token have been rebranded as "Classic" versions of their respective systems. Once known as Terra Luna, the new Terra environment is now just called Terra.

However, Terra LUNA has not been as successful as the original LUNA token. Since its introduction in late May 2022, the value of the LUNA token that backs the [Terra 2.0](#) chain has dropped by 91.6%.

However, Luna Classic has not been successful while still using the original Terra Luna [blockchain](#). When compared to its all-time high, LUNA Classic has lost 100% of its value, as reported by CoinGecko. At the time of writing, one LUNC coin could be purchased for \$0.0000874, making it a cent cryptocurrency.

### Pre-sale of Tamadoge Generates \$5.7 Million

Increased interest from investors was reported during the presale for Tamadoge, making it one among the most sought-after cryptocurrencies. There has been a lot of interest in purchasing the newly introduced meme coin, Tamadoge, which has raised over \$5.7 million during its presale.

Launching Tamadoge to the public via listings on CEXs and DEXs could result in exponential price increases of up to 10x (DEXs). Public sale may occur in the fourth quarter of 2022, and the presale has a hard ceiling of \$19 million.

Tamadoge accepts Ethereum, USDT, and fiat currencies for the purchase of TAMA tokens. In light of the rising demand, the presale may expire earlier than expected.

In the midst of the bear market, people might still benefit from investing in other cryptocurrencies through presales. Despite the market's general downtrend, new cryptos like Tamadoge (TAMA) provide an excellent opportunity for early investors to get in on a project that has the potential to yield significant gains in the future.

Pre-sale prices that go over well are typically more stable than the bitcoin market as a whole. Gains

of 10x to 100x were seen in some pre-sales. A good example is the IBAT token for Battle Infinity, which saw a presale increase of over 700% due to high demand.

## The Foundations of Tamadoge are Solid

As a result of the hard work of the project's developers, Tamadoge has quickly become one of the most sought after tokens in the cryptocurrency market. Tamadoge stands out among other cryptocurrencies due to its status as a meme coin with favorable tokenomics and greater practicality.

Two billion TAMA tokens are the maximum that will ever be created for Tamadoge. As demand increases, the price of TAMA tokens will rise thanks to this supply. In the meme coin market, Tamadoge's superior tokenomics provide it an edge.

However, Tamadoge is another example of a crypto gaming venture. The project has included blockchain gaming into its design to increase the token's appeal and utility. Axie Infinity, The Sandbox, and Decentraland are just a few of the successful initiatives that have their roots in the P2E gaming ecosystem. The network may be able to accomplish more thanks to the efforts of the Tamadoge group.
