Abstract:

The future value of Terra Classic is expected to decrease.

The projected value of one Terra Classic in the year 2022 is \$0.00046.

In 2025, the predicted value of one Terra Classic coin is \$0.00054.

We project a price of \$0.00173 for Terra Classic in the year 2030.

Terra Classic's performance during the past week and a month

Even now, Terra Luna Classic lagged behind the competition.

Take a look at the fluctuating market capitalization of Terra Luna Classic over the past four weeks. A rise in prices can be attributed to Burn (the initial activity of the community), enhancements indicated by the community, or just the general upward trend of the market. Once Burn was the only thing happening, prices started going down, even while the rest of the crypto market was going up. The state of Terra Classic is now precarious. Since volumes are at their lowest point of the month, the price may go to below \$0.0009 very soon.

Is it wise to put money into Terra Luna?

Optimistic projections for Terra coin are currently in place. The success of these projections hinges on the community's ability to put its ideas into action during the next two weeks. Therefore, we do not think Terra Coin is a reliable investment option right now. In a short time frame, it may turn into a profitable investment.

Where is the ceiling for Terra Classic?

Assuming a yearly burn rate of 3-4% and community resolution of vision, distinction, and value issues, Terra Classic's potential growth to 22 times current levels by 2030 is not out of the question. Within the following several weeks, the community and Luna Foundation will make a decision about the future.
