Toon Finance - Everything you need to know

Original:

<https://www.btcc.com/en-US/academy/research-analysis/toon-finance-everything-you-need-to-know>

Toon Finance is a Web3 ecosystem that aims to fix the externality surrounding the P2E gaming demand. Toon Finance presale is still ongoing.

With time and tide, [cryptocurrencies](#), non-fungible tokens ([NFTs](#)), and the underlying [blockchain technology](#) have gained immense popularity. The efforts to revolutionize the technological aspect of the world have shifted blockchain technology and its related elements to the forefront.

Seeing the ongoing growth and demand of this technological innovation, various gaming industries decided to incorporate blockchain technology, thereby giving rise to the birth of the [Play-to-Earn](#) (P2E) gaming model.

However, there have been various inconsistencies surrounding the P2E space. Hence, Toon Finance a P2E decentralized exchange platform was launched. This decentralized application is a stand-out P2E platform that provides its players a different yet rewarding gaming experience with its "Players Vs Player Battle Ground" game mode.

What is Toon Finance crypto project?

Toon Finance protocol is a decentralized exchange application platform. The platform is designed by a team of market leaders and blockchain developers to solve the externality surrounding the P2E gaming demand. This is done by backing up the P2E metaverse with SHA256 encryption.

The SHA256 encryption is for players to join the space ground battle lobby and que up against other players in a decentralized que system and game mechanics. It's a one-stop platform that provides users with an incredible blend of utilities such as NFT trading, cryptocurrency exchange, and cross-chain bridge.

Toon Finance also has a Space Explorer for players who do not wish to go PVP in the Space Battle Ground. The former will allow users to play through an MMORPG-style setting and find common, rare, and super unique NFT's to advance and equip their Toons for enhanced gameplay.

Additionally, for players who choose to participate in the PVP Space Battle Grounds, there will be a Leaderboard System integrated and implemented into the gameplay. NFT Airdrops will be continuously sent to users, who rank at the top of the leaderboard, which can be used in the P2E model.

Tokenomics of TFT

TFT is the native token of the platform that will be used in the Coin and Checkers Battle Ground with more and more PVP games such as cards which will be introduced shortly.

The Toon tokens will be utilized by the players to advance their Toons and purchase key NFTs to further advance their Toons in the P2E gameplay. TFT is also used for governance votes to determine the direction of community games being developed.

The tokenomics of the TOON token are as follows:

There are 1 billion TFT tokens in circulation wherein 50% is allocated to the presale. From among the remaining, 40% is for the exchange and 10% is kept aside for presale end burn. Users can purchase the tokens from Toon Finance presale dApp on their main platform.

Token holders will be charged a 2% developer tax and there will be a 25% tax allocated to the P2E prize pool. These taxes are on NFT Purchases in the P2R System only. Users can avail the additional opportunity to win the collected prize tax pool by joining forces to defeat the invading Alien Toons.

Toon Finance presale and listing

The Toon token has been listed on two of the biggest cryptocurrency exchange platforms: Crypto.com and CoinMarketCap. This makes the coin furthermore reliable and sustainable.

There is also an ongoing presale on the Toon Finance platform. Users interested to be a part of the Toon Finance protocol can join the movement toward a decentralized environment. To become a part of the pre-sale the users have to connect their wallet and they are good to go.

This [Ethereum](#)-based decentralized P2E platform is backed by market experts and passionate cryptocurrency traders. Resulting in users having a seamless and exciting experience with the Toon gameplay.

Toon Fi roadmap ahead

Coming up with such an innovative platform, Toon Finance has planned its roadmap for the upcoming years with the vision to enhance the community engagement of the platform. There is a proposed roadmap for the presale and initial launch of the platform which is subject to change depending on the community vote.

The Toon Fi roadmap involves the Toon Finance Airdrop for users to buy NFT Mint Passes & contribute to the presale. Here the first 1,000 members are also entitled to receive NFT Mint Pass at zero cost.

Moving forward it's the presale launch to mark the completion of the presale dapp and make it ready for presale campaign systems active.

The platform has also planned a Live AMA with a community vote on the platform and the release of the NFT Artwork. Additionally, the Toon protocol also looks forward to announcing its various partnerships and collaborations with various other platforms.

Finally, the Toon Finance platform will soon go live after the pre-sale ends. Thus bringing various use cases to its users such as decentralized exchange ([DEX](#)), Space Battle Grounds, Bridges, etc.
