What is MANTRA (OM)?

MANTRA is a vertically integrated blockchain project launched in 2020. Previously known as “MANTRA DAO,” the project aims to play an active role in crypto trading services, fundraising, and innovation, adopting an open and transparent structure.

Recognizing the potential of Cosmos and the missing piece of the current RWA puzzle in the ecosystem, MANTRA was the first pioneer to make RWA more accessible to user profiles in Web3.

MANTRA’s architecture integrates multiple blockchain technologies to create a versatile and inclusive ecosystem. Following the principles of transparency, community control and financial inclusion, the platform offers a variety of DeFi services, such as staking, lending and governance.

By integrating these capabilities into one ecosystem, MANTRA (OM) simplifies the user experience and enhances the potential for collaborative growth in the DeFi space. The ecosystem’s commitment to innovation and community-driven development has made it an important player in the evolving world of decentralized finance.

It should be noted that MANTRA was originally just Polkadot’s first project, and now offers services on Ethereum, Binance Smart Chain, and Polygon.
