# Will the Value of the Cryptocurrency Industry Reach \$3 Trillion By the End of 2022?

Original:

<https://www.btcc.com/en-US/academy/research-analysis/will-the-value-of-the-cryptocurrency-industry-reach-3-trillion-by-the-end-of-2022>

**In the next few months, the entire industry led by bitcoin and [Ethereum](#) collapsed and lowered the value of [altcoins](#) and general cryptocurrencies. The cryptocurrency industry reached a market value of \$3 trillion as early as November 2021. The entire industry, led by bitcoin (BTC) and Ethereum (ETH), collapsed in the next few months, dragging down the value of altcoins and general cryptocurrencies.**

---

Now, the mood seems very positive, as key analysts predict that the industry is about to reach (or even exceed) a market value of \$3 trillion – as investors and cryptocurrency enthusiasts are cheering. This is really good news for experienced cryptocurrency investors and new venture capitalists looking for opportunities to diversify their sources of income. The digital asset market has existed for a little more than a decade, and its predicted valuation has more than quadrupled its value.

We have become increasingly accustomed to deep-rooted tokens, such as bitcoin (BTC) and prominent networks, such as Ethereum (ETH) and Solana (SOL) and calyx token (CLX), which continue to upgrade new technological advances and functions, thus attracting new investors. The air is filled with excitement, and decentralized Finance (defi) may become a reality in the next few years.

## Calyx Token (CLX) “Empowering the Community”

Calyx token (CLX) is likely to be the next great success in the cryptocurrency market, following in the footsteps of Ethereum (ETH) and bitcoin (BTC). Through the liquidity source mechanism, this cryptocurrency can obtain liquidity from many different sources and use it to provide its users with the most competitive swap rate.

One of the most significant advantages of using calyx tokens (CLX) is that once users deposit tokens into a common liquidity pool, they can earn part of the fees generated by transactions. By providing mobility, users can generate additional revenue without spending any effort.

It is also possible to use the calyx token (CLX) for broader governance. Voting and voting will take

place on calyxdao, and all suggestions will be voted by the public. Analysts believe that this combination of features is very special, and the calyx token (CLX) may become large and surpass the “Ethereum killer” Solana (SOL).

Now the pre-sale has been opened, and investors have seen the return.

## **Bitcoin (BTC) and Ethereum (ETH) — the Leader of Cryptocurrency**

Recent data from industry experts show that despite the recent decline in the market value of cryptocurrency, a large number of traders in bitcoin (BTC) and Ethereum (ETH) are making profits. According to the statistics on the chain, 58.44% of BTC addresses and 69.25% of eth addresses are rising and making profits. Although they have fallen by 42.8% and 40.75% from their historical highs, the profitability of leading cryptocurrencies, bitcoin (BTC) and Ethereum (ETH), is still above average.

At present, in terms of market value, the leading cryptocurrency bitcoin (BTC) has increased by 2.29% in the past 24 hours, with a price of \$39650 as of press time. Ethereum's eth also rose by + 2.04% at the time of publishing, and the trading price was \$2928.
