Worldcoin (WLD) Price Prediction 2025, 2026, 2030

Key takeaways

- Worldcoin might have a peak price of \$2.11 and an average of \$0.86 in 2025.
- The lowest WLD price may fall to \$3.69 by 2028, while the highest price may reach \$4.39.
- It is anticipated that Worldcoin's price will peak at \$7.18 in 2031.

In line with the world prediction, Worldcoin is drawing interest from both investors and fans in equal proportion. Worldcoin's token, WLD, experienced a sharp increase in value during the first week of May, making it one of the market's best-performing [cryptocurrencies](#). This increase suggests a strong relationship between WLD's market movements and breakthroughs in artificial intelligence (AI) technology, as it coincides with increased activity surrounding AI technologies, especially those involving OpenAI. Speculative stories about possible partnerships and new projects that would include additional AI techniques into cryptocurrencies are partially to blame for the buzz.

What is Worldcoin (WLD)?

As a public utility that gives ownership to everyone, the Worldcoin project aims to build the largest

identity and financial network in the world.

The Worldcoin system is built upon World ID, a worldwide identity network that ensures anonymity. To verify one’s humanity online (“Proof of Personhood”) using World ID, one can use zero-knowledge proofs in a private manner.

If you want to utilize Worldcoin, you need to get the World program, which is the first wallet program that lets you make a World ID. In order to have their World ID Orb verified, users visit the Orb, which is a physical imaging equipment.

Most Orbs are operated by a network of independent local businesses called Orb Operators. The Orb uses multispectral sensors to verify a person’s identity, and by default, it deletes all photos from the device (unless Data Custody gives their specific agreement, of course). All users with validated World IDs verified by Orb are eligible for free WLD token distributions on a regular basis.

Now we can talk about WLD price forecasts for the current year and the years to come.

Cryptocurrency	Worldcoin
Token	WLD
Price	\$0.9632
Market Cap	\$1.27B
Trading Volume	\$143.11M
Circulating Supply	1.32B WLD
All-time High	\$11.82 Mar 09, 2024
All-time Low	\$0.9758 Sep 13, 2023
24-hour High	\$1.02
24-hour Low	\$0.9494

Worldcoin Price Prediction 2025

In May 2025, the worldcoin market is anticipated to witness a variety of price moves for worldcoin.

Prices could range from an average of about \$0.97 to a low of \$0.85. At its peak, WLD might be worth as much as \$2.05.

Experts predict that by the year 2025, Worldcoin will reach a low of \$0.86 and a high of \$2.04. At its peak, WLD might be worth \$2.11.

Worldcoin Price Prediction 2026

We anticipate that Worldcoin will break through the \$2.22 average price barrier in 2026. The price range that investors can anticipate is \$2.06 to \$2.48.

Worldcoin Price Prediction 2027

It is anticipated that WorldCoin would achieve a minimum price of \$2.83 in 2027, possibly as early as next week. With an average trade price of \$3.27, the WLD price has the potential to reach a top of \$3.33.

Worldcoin Price Prediction 2030

The price of Worldcoin (WLD) can range from \$3.31 to \$4.35 in 2030, according to CoinCodex's crypto price projection.

According to DigitalCoinPrice, by the year 2030, the price of WLD can reach \$4.62 to \$5.33.

Because WLD is a cryptocurrency, its value can rise and fall wildly like that of any other token. So, before you put your faith in any source that claims to know what the WLD price will be in 2030, you should know that.

There is still five years till 2030, and a lot of cryptocurrency could be irrelevant by then. Because of this, predicting the future value of any token, including WLD, is challenging. To make it through the next five years and keep climbing the crypto market, WLD should focus on developing its blockchain technology and forming partnerships with other major digital crypto companies. In order to make a well-informed investment choice in the WLD token, you need conduct research and be informed about the newest developments in the next years.

Worldcoin Tokenomics

The Worldcoin tokenomics structure is comprehensive, with a total supply of 10 billion WLD tokens. These tokens are allocated and distributed across various categories to ensure diverse participation and long-term growth of the Worldcoin ecosystem.

The tokens are allocated as follows:

- 1. User Grants (25%):** 2.5 billion WLD tokens are allocated for User Grants, given to users after biometric verification. The distribution is phased over 15 years, with users receiving less as more people join the network.
- 2. Ecosystem Fund (10%):** 1 billion WLD tokens are assigned to the Ecosystem Fund. This fund aims to provide financial resources for strategic investments, partnerships, and other operations that help grow and secure the Worldcoin ecosystem.
- 3. Community Grants and Incentives (10%):** 1 billion WLD tokens are earmarked for Community Grants and Incentives, aimed to incentivize contributions to the growth of the ecosystem, like the development of new protocols, systems, and integrations.
- 4. Initial Development Team (12.5%):** 1.25 billion WLD tokens are allocated to the initial development team for their work on the Worldcoin project. The tokens are vested over four years, with a one-year cliff.
- 5. TFH Investors (12.5%):** 1.25 billion WLD tokens are assigned to Tools for Humanity (TFH)

Investors who provided initial funding. These tokens are also vested over four years.

6. TFH Reserve (20%): 2 billion WLD tokens are held in reserve by TFH, serving as a backup for the project to counter unexpected circumstances or to exploit new opportunities.

7. Liquidity Provisioning (10%): 1 billion WLD tokens are allocated for liquidity provisioning. This strategy ensures that the token has sufficient liquidity, which facilitates price discovery and stability.

To maintain long-term value and utility of WLD tokens, there's a provision to mint up to 1.5% of new tokens per year after 15 years, which will be controlled by the protocol's governance system.

Though the Worldcoin tokenomics reflects a well-thought-out balance between short-term growth and long-term sustainability, in our opinion, long term, we do not see the token increasing its value by leaps and bounds because of the high inflation.

Main Utilities of Worldcoin

Worldcoin's key utilities are as follows:

1. Digital Identity Verification: Worldcoin's World ID offers a privacy-preserving, global identity network. It uses proof of personhood, verified through a biometric device called the Orb, to establish that an individual is unique and human, helping distinguish humans from AI online while preserving privacy.

2. Global Financial Transactions: Worldcoin's digital currency, the Worldcoin Token (WLD), is designed to provide universal access to a decentralized financial infrastructure. This can facilitate instant, borderless financial transactions, offering a new level of financial inclusion and economic opportunity.

3. Network Incentive Alignment: The issuance of Worldcoin tokens to network participants aligns incentives around the growth of the network. This helps to bootstrap the network, potentially leading to the Worldcoin token becoming the most widely distributed digital asset.

4. Governance and Resource Distribution: By providing a secure, private, and universal digital identity, Worldcoin can enable fairer airdrops, protect against bots/sybil attacks, and allow for the fair distribution of limited resources. Additionally, it can enable more democratic processes and novel forms of governance, potentially paving the way for an AI-funded Universal Basic Income (UBI).

5. Infrastructure for Web3: Worldcoin could provide a critical building block for the next-generation internet (Web3), offering a secure, privacy-preserving, and human-verified identity system that is currently lacking in the digital realm.

Will Worldcoin Reach \$100?

Given the current state of the market, the current price levels of the coin, and the substantial increase in market capitalization needed, Worldcoin's projection of \$100 is extremely implausible. Extraordinary expansion and acceptance would be required to accommodate such a rise.

Is Worldcoin a Good Investment?

You should know what to expect from market volatility before putting your money into any cryptocurrency, including WLD. Another thing to keep in mind is that the cryptocurrency market attitude can change rapidly, and large exchanges may delist a coin that was once seen to be the future. Therefore, before predicting the future value of the WLD token, it is wise to study its foundations.

FAQs

Is Worldcoin legit?

Top-tier exchanges like Binance and Uniswap have listed Worldcoin, so it's hard to believe that Worldcoin is a scam token at this moment. However, there may be a lot of volatility once its speculation gets over.

What is Worldcoin Orb?

Worldcoin Orb is a custom biometric device designed to verify an individual's unique human identity as part of the World ID system. It allows individuals to prove they are human without revealing their real-world identity, distinguishing humans from AI online while preserving privacy.

How can Worldcoin promote global equality of opportunity?

Worldcoin aims to increase global equality by providing universal access to a decentralized digital identity and financial network. By distributing WLD tokens to all network participants, it enables instant and borderless financial transactions. Its World ID system could also facilitate global democratic processes, help maintain bot-free digital communication, and enable more equitable distribution of resources.

Is Worldcoin safe?

Worldcoin's World ID system uses custom biometric hardware, the Orb, to establish proof of personhood, ensuring that each World ID is unique to an individual. This proof of personhood system is designed to prevent fraudulent actors from acquiring more than one World ID or using someone else's credentials. Moreover, all images taken by the Orb are promptly deleted on-device by default to protect user privacy.

Why Trade Crypto on BTCC

Founded in 2011, BTCC is among the world's oldest and most reliable bitcoin exchanges. Many traders use BTCC because it has established a solid reputation in the market for security and regulatory compliance over the years. The platform is especially well-suited for traders in North America and Europe, with presences in the US, Canada, and Europe.

In addition to bitcoin trading, BTCC provides traders with access to non-crypto assets including gold, silver, and U.S. equities through cutting-edge features like copy trading, perpetual futures, and tokenized stocks. Both novice and seasoned traders searching for a secure and regulated platform can benefit from BTCC's range of offerings.

The firm's products are designed to meet the needs and desires of both rookie and experienced traders. Here are five reasons for using the exchange:

- Numerous transferable assets
- Excessive trading leverage
- Strong copy trading capabilities
- Perfect security record
- Interface that is easy to use
- Accessible to traders in the US and Canada

[BTCC Bonuses and Special Offers]

(1) **[New User Welcome Reward](#)**: As a new user, you can claim a welcome reward of up to **10,055 USDT**.

(2) **[Referral Program](#)**: You can earn up to **35% commission on your referrals, plus up to 10,060 USDT in rebates per referral**.

By creating an account, I agree to BTCC's [Privacy Policy](#) and [User Agreement](#).

Step 2: Finish the KYC

The Know Your Customer (KYC) procedure is the next step after your account is operational. The main goal of this stage is to maintain compliance and security. You must upload identification, such as a passport or driver's license. You'll receive a confirmation email as soon as your documents are validated, so don't worry—it's a quick process.

Step 3. Deposit Funds

After that, adding money to your account is simple. BTCC provides a range of payment options, such as credit cards and bank transfers. To get your money into your trading account, simply choose what works best for you, enter the amount, and then follow the instructions.

- **Fiat Deposit.** Buy USDT using Visa/Mastercard (KYC required).
- **Crypto Deposit.** Transfer crypto from another platform or wallet.

Fund Your Account

I don't have crypto assets

Fiat Deposit

Fund your account with USDT using
Visa/Mastercard

P2P

Buy and sell cryptos with flexible payment
methods and 0 transaction fees.

I have crypto assets

Crypto Deposit

Get the deposit address for BTC, ETH, or any
other crypto and deposit via the blockchain.

Step 4. Start Trading

If you wish to follow profitable traders, you might go for copy trading, futures, or spot trading. After choosing your order type and the cryptocurrency you wish to trade, press the buy or sell button. Managing your portfolio and keeping track of your trades is made simple by the user-friendly

interface.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater

security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
