What is XDC Network (XDC)?

One hundred and eight Masternodes power the XDC Network. The [XDC](#) network boasts cheap transaction fees, in contrast to Ethereum's congestion and hefty fees. The average confirmation time for its lightning-fast transactions is just 2 seconds. It also has Ethereum compatibility.

XDC Network's reliability, security, and chain finality are ensured by methods including double validation, a genuine randomization process, and staking using smart contracts. In addition, the Network supports the execution of any EVM-compatible smart contract, atomic cross-chain token, or protocol, as well as the XDC Digital Contract (XDC).

The team has ambitious intentions to develop the platform and include new methods. The creation of private chains, the parallelization of the EVM, and the incorporation of hardware are all examples. Each one contributes to the whole and will have a positive effect over time. They will be studied, and eventually incorporated into the XDC network.

The XDC coin is the XDC Hybrid Blockchain's original utility token. For XDC Hybrid Blockchain-based decentralized apps, this coin represents the means of final payment. MyContract, Kramaa, TradeFinex, iFactor, TurantPay, Land Registry, and Blockdegree are just a few of the platforms that put the XDC utility token to good use.

One hundred billion XDC tokens are available on the XDC blockchain.

Will XDC Reach \$1?

Many cryptocurrency investors are wondering if the XDC coin can reach a \$1 cap again now that it is gaining in popularity. In 2021, XDC coins are worth more than \$0.15. Based on past results, we may assume that XDC coin will be able to achieve the goal of \$1. If the present rate of increase of XDC coins continues, our long-term forecast calls for that value to be reached between 2026 and 2027.

There is a lot of potential in the XDC coin initiative. Nothing is unattainable in the cryptocurrency market. As history has shown, it is difficult to claim that price predictions may be correct because a strong bull run or bear rally can wipe out all the forecasts in a matter of seconds. The XDC coin's price has the potential to rise if additional investors are drawn to the initiative, and it may reach its

\$1 target before our XDC coin estimate.

Will XDC Reach \$100?

On August 21, 2021, the price of one XDC token reached an all-time high of \$0.19 USD. The most recent changes to XDC have made it clear that this is not the case, and that reaching \$100 before 2030 is quite unlikely.

But as the adage goes, “impossible is possible” if a bull market occurs and prices surge in the far future.
