

The image is a promotional banner for BTCC. On the left, the BTCC logo is displayed above the headline "Enjoy fees as low as 0.03%". Below the headline, there are four bullet points: "70+ crypto futures", "24/7 customer support", "100,000 USDT for demo trading", "10-150x flexible leverage", and "Support credit card deposits". On the right side, there is a graphic of a smartphone displaying various financial charts and data. A yellow "Register Now" button is located at the bottom right of the graphic area.

**BTCC**  
**Enjoy fees as low as 0.03%**

- 70+ crypto futures
- 24/7 customer support
- 100,000 USDT for demo trading
- 10-150x flexible leverage
- Support credit card deposits

Register Now

## About WAX (WAXP)

Original:

<https://www.btcc.com/en-US/markets/WAX>

WAX is a purpose-built [blockchain](#) and protocol token designed to make e-commerce transactions faster, easier, and safer for all participants. The WAX Blockchain uses Delegated Proof of Stake (DPoS) as its consensus mechanism and is meant to be fully backward compatible with EOS. The custom features and incentive mechanisms developed by WAX are designed to optimize the blockchain's usability in e-commerce, and encourage voting on guilds and proposals.

The custom features and the incentive mechanisms developed by WAX are intended to optimize the blockchain's utility specifically for use in e-commerce, with the goal of encouraging voting on proposals.

To make this possible, WAX created a suite of blockchain-based tools which decentralized application ([DApp](#)) marketplaces and non-fungible tokens can be built upon.

Services such as WAX Cloud Wallet, SSO and OAUTH support e-commerce operations, the latter being a native RNG service and a developer portal. WAX's blockchain architecture supports 500-millisecond block time and zero-fee transactions for customers. It also makes use of voting rewards to incentivize participation in the selection of block producers and improvement proposals.

## What Makes WAX Different?

WAX features a WAXP-to-Ethereum (ETH) bridge that allows WAXP token holders to convert their tokens into WAXE, which is an Ethereum-based ERC20 utility token.

Users willing to participate in WAX tokenomics need to burn their WAXP tokens in order to get WAXE through the Ethereum bridge. They will then need to stake the WAXE tokens on the Ethereum distribution contract.

WAXG is an Ethereum-based ERC-20 governance token that is distributed to WAXE stakers. The distribution is based on a set timetable and is proportionate to the percentage of the WAX Economic Activity pool. The token holders can govern the allocation and distribution of economic value on the platform as a result.

The WAX Economic Activity pool is a smart contract that accumulates a percentage of generated WAX fees and can be converted into ETH for distribution to WAXE stakers. It can also be given to WAXG token holders that decide to burn the tokens they already have.
